## AUSTRALIA 2010 IHMSA/SSAA NATIONAL CHAMPIONSHIPS

Big Bore Champions

L to R Kim Emery (P, U, US), Dominic Piscioneri (UASHS), David Robinson (UAS), Wayne Christian (R), Keith Rigby (PS), Lou Forner (UHS)

### CANBERRA, AUSTRALIA SSPC-ACT Club October 2 - October 8, 2010

The 30<sup>th</sup> National Championships of IHMSA Australia Inc are over, but definitely not forgotten. All Australian States, except the Northern Territory were represented in the 39 shooters who entered. Over the 6 days of competition there were 395 matches shot which means 17,795 rounds being fired down range. This divides up into 149 Small Bore, 62 Field Pistol and 184 Big Bore matches. This can be further broken down so that you can see the popularity of the various matches.

UASHS	.....14

There were only 3 competitors this year who ventured to shoot all 15 categories on offer. Six competitors shot 14 categories while the majority shot between 10 and 12 of the categories. Ammunition was the restricting factor here for the competitors who flew into Canberra. Even to freight ammunition can be very difficult

#### The Range:

Thanks must go to Cheyne Fischer for all his work getting the Range ready for the competition. Due to recent rain the green grass made it look magnificent and it was with awe that we watched the magpies spend all day looking for insects and grubs in the grass between the 100m and 150m mound with projectiles whizzing over their heads constantly. Ducks would wander in as well for a bit of green pick and had to be shooed carefully back out. On the last two days a shingle back lizard ventured out from under the "boardwalk" for some warming sunshine.

#### Small Bore:

While the weather was not ideal in that it was heavily overcast and threatening rain with the odd shower thrown in, light conditions were fairly consistent. There were only 7 x 40's shot during Small Bore - Matt Seears in Revolver, Joseph Brajkovich in Unlimited and Terry Jolly, Joseph, Noel Warner, David Robinson and Bruce Dunbar in Unlimited Any Sights. Shoot offs in the UAS category were hotly contested with Terry winning on the first run through, followed by David Robinson taking second on the second run, then the fight for third began with Joseph and Noel taking four goes to sort it out with Joseph taking third place in the end. The following table shows the variety of firearms used across the Small Bore matches. It is interesting to note that the Thompson Center Contenders are still the favoured one in production and Standing while the Brno's, designed and built by Bruce Dunbar, come in slightly ahead of the Anschutz

in the Unlimited and UAS category. The Freedom Arms and Ruger revolvers run neck and neck in the Revolver category.

Production - 19xTC, 5xFA, 2xBF, 2xTCG2, 2xDW, 1xRUG, 1xBRN.

Revolver - 13xFA, 12xRUGm 3xS&W, 2xDW, 1x MAN.

Standing - 31 x TC

Unlimited - 13xBRNO, 10xANS, 3xTOZ, 1x HAM, 1xWALTH, 1xHISTD.

UAS - 7xBRNO, 6xANS, 3xTC, 2xHAM, 1xVOS, 1xWAL.

#### Field Pistol:

Both Field Pistol Categories had some very good scores posted - Bruce Dunbar shot a 35 in Production followed closely by Wayne Christian and Greg Dawson, both on 34. In the Any Sight category, Matt Seears and Brian Marsden both shot a very creditable 33 with Matt going on to win the shoot off. Once again, the following table show the firearms and calibres most used in the

Junior to Daniel Harding with a 66. The Open Field Pistol Two Match Aggregate went to Bruce Dunbar with a 66 and the Ladies to Melinda Mullen with a 55 and Junior to Daniel Harding with 25. The National Champions were, Production, Cheyne Fischer 39, Revolver, Matt Seears 40, Standing Wayne Christian 30, Unlimited, Joseph Brajkovich 40, Unlimited Any Sights, Terry Jolly 40, Field Pistol Production, Bruce Dunbar 35 and Production Any Sights Matt Seears 33. A good night was had by all.

#### Big Bore:

After a well deserved lay day, practice day, sight seeing day or whatever it was down to business again - trying to squish 8 matches into 3 days and allow time for shoot offs on the last afternoon before the sun set. Once again, the weather was very kind - no rain but strong gusty wind did necessitate the clamping of rams for a day. Russell Mowles set the benchmark early with a 40 in Production and over the 3

30th Anniversary Oldies who were present at the 1st Nationals

L to R Bob Midworth, Rob Abel, Trevor Jessop

Field Pistol Matches. Everyone used a T/C frame with a large variety of different calibre barrels.

Production - All TC, 16x22 HORN, 5x32.20, 3x357, 2xG2 357, 2x22MAG, 1x25.20, 1x270 REN.

Production Any Sight - All TC, 22x22 HORN, 3x357, 2x32.20, 2xG2 357, 1x25.20, 1x270 REN.

The Small Bore and Field Pistol presentation was held in the big "shed" at SSPC - ACT with mention being made that there were 3 shooters in attendance that had also been present at the first Nationals held in Canberra in 1980, namely Bob Midworth, Rob Abel and Trevor Jessop. The only other two who were in attendance then and who are still shooting are Wendel Poschl who could not make it this year and Kim Emery who missed out on the first part of the shoot as he had been overseas competing. The Open 100m Small Bore Four Match Aggregate was won by Matt Seears with a 146, the highest Small Bore Aggregate shot at a Nationals for some time. The Ladies went to Melinda Mullen with a 133 and the

days this was followed by three others - John Harding, Cheyne Fischer and Kim Emery. Kim went on to hit 3 shoot off targets and claim victory. The highest score in Revolver was 38 by Wayne Christian and Russell Mowles. It took 3 goes at the shoot off targets before Wayne won the category. Standing also saw a shoot off with Keith Rigby and John Harding, both on 29. Keith scored more shoot off targets here to score victory.

There were five 40's shot in the Unlimited category - Cheyne Fischer, Kellie Coleman, Wayne Christian, Terry Jolly and Kim Emery. Everyone thought the shoot off could take a while, but when Kim hit 4 targets on the first run it was all over. The Unlimited Any Sight category was a very different story. Noel Warner, Joseph Brajkovich, Dave Larvin, Bob Midworth, David Robinson, and Dominic Piscioneri all managed the perfect score. In the first run of shoot off targets, (half scale chickens at 200m) David Robinson scored 4 and Dominic 3 to take first and second. Noel,

# President's Report Vice President's Column

Ken and I want to wish all of you and your families a Happy New Year. We are gearing up for the SHOT SHOW – 2011 that will be starting this month. We had great success last year with door prizes and we anticipate it will be great going for this coming year. We will be thanking our industry supporters in person and asking them for their continued support. We will be handing out press packages to entice more advertising also. Look for articles on our visit next month. My goal is to journal this trip for a day by day replay.

Please note that our IHMSA World Championship Match will be held at Ft Stockton, TX. We are finalizing details for this match, look for more details in next month's *IHMSA News*.

We have many challenges ahead of us in this organization I am asking all of you to

contact me with any ideas or changes you may like to see. Remember this is your organization, I just steer the helm.

Have a great and healthy year! Until next time shoot often and safely.

By Steve Martens

IHMSA Practical Hunter Silhouette

The board has approved the two year trial of the proposed Practical Hunter Silhouette classes. The revised rules follow this article. The 12" barrel length was eliminated and a shorter overall length was adopted. This will allow common hunting guns such as currently produced T/C Encore and G2 with factory 15" barrels to compete, while keeping the longer bolt action guns such as the XP-100 out of the classes. The intent of these classes is to allow handgun hunters a place to improve their skills with a handgun and to compete with guns that look like their own. These classes will have many guns that are available at local dealers.

Silhouette has always been a "bring what you got and shoot it" sport, but as the game has evolved and the top shooters have pushed the envelope of what is possible with a handgun, we might say we have left most of the current handgun manufactures behind. It is a common misconception that a new shooter has to have the same gun as the top shooters to be competitive. Nothing could be farther from the truth, but when they are on the firing line next to a custom gun that cost 2 or 3 times theirs, they will get that impression. We tell them that with our class structure they are only competing against other shooters with like ability. But human nature is that we all want to be the best at every activity we attempt. They will get the idea that if they want to get to upper levels of the sport they will have to lay out the big bucks to be competitive. Again this is just not true, as most shooters will have tons

of stories of the much less expensive gun winning Regional and International matches.

The Board hopes that these new classes will dispel some of those misconceptions. We are hoping that we will see increased support from the current handgun manufactures. We already have a commitment for a donated handgun to be given away and that was before the SHOT SHOW. One idea for the handgun(s) giveaway is for everyone who competes in the new "P. Hunter" classes during the year is to get one chance for every entry you shoot. We will have a drawing at the end of the year. We could also give new members who join IHMSA during that year 2 chances for every entry they shoot. That would be a good way to monitor the amount of shooters we have participating and give us input at the end of the two year trial period.

We are working on promotional items for these new classes. They include posters you could put up at local gun stores, gun ranges, sporting goods stores, etc. We are working to get some articles about silhouette shooting in some publications. There also has been talk about doing a new "Silhouette loads" book that would collect the wisdom of our silhouette shooters, or maybe some "YouTube" videos showing how much fun you could be having at one of our matches?

We also need the support of the local shooters and match directors to attract new shooters to the sport. You are on the front lines and more than anything we need shooters at our local matches to grow this sport.

## 2011 New Product Announcement

.338 Caliber (.338 diameter)  
225 grain SPT Pro-Hunter (Part # 2620)

Sierra is pleased to introduce the newest member of our Pro-Hunter line; the .338 caliber 225 grain SPT Pro-Hunter. The flat based design and lighter weight of this projectile make it a great choice for medium & large game. Combine that with Sierra's world renowned accuracy, and you have a perfect choice for those hunters seeking a reduced recoil alternative where a heavier bullet is not required.

## Installment Plan Life Memberships

The Installment Plan for Life Membership allows you to purchase a Life Membership by making four monthly payments of \$105.00 each (a total of \$420.00), or in the case of a spouse two \$50.00 each (a total of \$100.00). When your last payment is received, Headquarters will send your Life membership card, certificate, and pin.

If you're in the middle of your membership year, you can purchase a Life Membership now and apply the unused portion of your current membership. Call IHMSA Headquarters at (801) 733-8423 to find out how much credit you'll received for your current membership.

Life Membership is a great way to enjoy IHMSA for years without the hassle of paying yearly dues and show your support of IHMSA at the same time... order yours today!!!

## Please Remember!

**Deadline for Match Reports, Match Schedules, and Advertising is the first of the month preceding date of issue.**

**Please mail early enough so your material is received at Headquarters by the first of the month.**

**This cycle period is necessary to allow for processing, printing, and mail delivery.**

**Thank you for your cooperation.**

## SANCTION FEE NOTICE

Please make every attempt to send in your Sanction Fees promptly as the Sanction Fees help us pay for the printing of the Match Results.

Infrequently we have a club(s) that does not remit sanction fees for a match held. We understand club officers are busy, so we just send a gentle reminder. Still failing to receive the fees, a second notice is forwarded.

A final notice is sent if fees are still delinquent. After the final notice, the match dates will be deleted from the match schedule and the club's sanction will be withdrawn until the fees are received.

## OFFICIAL BULLETIN

The IHMSA Board of Directors has voted to exempt Air Pistols from the muzzle break rule regardless of barrel length since the physics of a muzzle break on short barreled air pistols provide no safety hazard. In accordance with this decision, the following rule is now in effect and will be included in the next rule book.

Section X. A. 2. of the rule book is now changed to read as follows:

2. **Not Allowed:** The following equipment, accessories, actions are not allowed:

- Artificial rests or supports, slings, padded or unnecessarily heavy clothing, or any kind of wrist or arm supports or bracelets.
- Applied friction materials or rubberizing on any part of the handgun.
- Muzzle brakes, compensators or ported barrels on handguns with barrel lengths less than 12 inches in overall length, including the muzzle brake, compensator or porting. (**Unlimited air pistols are exempt from this section.**)

Note that the change in the rule is printed in Bold only for highlighting the change. When printed in the next rule book it will not be highlighted separately.

## NOTICE

The IHMSA Board of Directors have voted to allow the printing of NRA match results in the *IHMSA News*, providing they are submitted by a club that is running dual (IHMSA/NRA) sanctioned events.

These results must be submitted by the established deadline presented in the previous edition of the *IHMSA News*, with the Dual Sanction Match Write-up and will be listed at the end of the IHMSA related report. No NRA reports will be printed without IHMSA reports/scores accompanying them. **Please send all Match Reports to IHMSA, Inc., P.O. Box 95690, South Jordan, UT 84095-5690, Phone - 801-733-8423, FAX: 801-733-8424**

## RUGER(r) ISSUES PRODUCT SAFETY WARNING AND RECALL NOTICE OF SR9 PISTOL

Southport, CT - April 9, 2008 - Sturm, Ruger & Company, Inc. (NYSE: RGR), announces that it has determined that Ruger SR9 pistols manufactured between October 2007 and April 2008 can, under certain conditions, fire if dropped with their manual safeties in the "off" or "fire" position and a round in the chamber. The pistols will not fire if the manual safety is in the "on" or "safe" position.

As a responsible manufacturer, we want to make our customers aware of this safety concern as soon as possible. Ruger is finalizing the design of a new trigger group which prevents firing when dropped and will retrofit at no charge all Ruger SR9 pistols with serial number prefix "330" (330-xxxx).

SR9 owners can obtain information or register for the recall by:

\* Visiting the Ruger website at: [www.ruger.com/SR9Recall/](http://www.ruger.com/SR9Recall/)

\* E-mail: [SR9recall@ruiger.com](mailto:SR9recall@ruiger.com)

\* Fax: 928-541-8873

\* Calling the Ruger SR9 Recall Hotline at 800-784-3701 between 8:00 a.m. and 8:00 p.m. EDT.

When Ruger is ready to retrofit a consumer's pistol, Ruger will send a shipping box, label and instructions for the FREE return of the SR9 pistol to our factory in Prescott, Arizona. Work will be completed promptly at no charge to the consumer and the pistol will be returned at Ruger expense. All owners will receive a FREE SR9 magazine as a "thank you" for their patience and cooperation.

All owners of Ruger SR9 pistols are urged not to use their pistol until it has been retrofitted with these new factory parts. If owners must use their SR9 pistol, the manual safety should be kept in the "on" or "safe" position except when actually firing.

About Sturm, Ruger: Sturm, Ruger was founded in 1949 and is one of the nation's leading manufacturers of high-quality firearms for the commercial sporting market. Sturm, Ruger is headquartered in Southport, CT, with plants located in Newport, NH and Prescott, AZ.

Sturm, Ruger & Co., Inc. Arms Makers for Responsible Citizens(r)

## Proposed New IHMSA Practical Hunter Classes

IHMSA is proposing to add 3 new Practical hunter classes on a 2 year trail basis to start Jan. 1, 2011 and end Dec. 31, 2012. These are optional classes to be offered at the discretion of the local match directors. They are not required to be offered at any State, Regional, or World Championship match. The purpose of adding these classes is to offer new shooters with hunting style handguns a place to compete with like style handguns in IHMSA.

Proposed New Class Names  
Practical Hunter Long Course  
Practical Hunter Short Course  
Practical Hunter .22 LR Course

### Class descriptions

All 3 classes are to be shot from any SAFE freestyle position including Prone, Kneeling, Sitting, or Standing.

The Practical Hunter Long Course will be shot on the 200 meter Big Bore range with the standard full size targets at their normal ranges.

The Practical Hunter Short Course will be shot on the 100 meter Field Pistol range with the standard targets at their normal ranges. The standard FP straight wall cartridges only.

The Practical Hunter .22LR Course will be shot on the 100 yard Small Bore range with the standard full size targets at their normal ranges.

### Class Rules

Any hunting style handgun with a maximum overall length of 21 inches.

Optics are allowed up to a maximum of 6x power.

Gun must be as manufactured with only cosmetic modifications

Ported barrels are allowed as long as they are shot from a safe position.

A rest such as a bipod or a sandbag supporting the barrel in a prone position may be used by a new unclassified shooter and by shooters in classes A and AA.

### Classification Scores

A	0-15
AA	16-25
AAA	26-38
INT	39-40

# The New Silhouetter Sight-In Days and Big Bore Half-Scale

By Ken Horowitz

The words "same time next year" can refer to an old Alan Alda film, the annually dreaded April 15 or to the great migration that occurs annually at Falls Township Rifle and Pistol Association (FTRPA). Of course I'm not talking about winged flocks or prancing herds, but rather the perennial sojourn of shooters to our sight-in days. For those of us who shoot all year round and have regular access to gun clubs, we sometimes forget about the millions of casual shooters, many of them hunters, who fire just a couple of shots per year and lack a practical means of determining whether their guns are sighted-in year to year. For these folks, we annually open our doors to the public for sight-in days and I've been a member of the club crew hosting the event for a number of years now. I look forward to helping people get their guns on target and I also like the entertainment value of watching how others shoot.

The skill sets of these folks cover the gamut of poor to impressive. On the impressive side, some shooters are there just to confirm a previous year's zero and at 100 yards print a sub-MOA group within a reasonable point of aim. For others, "group" is an inappropriate word; "pattern" would be more descriptive. One to the right, another to the left very high, the next one off the target board, and so forth. So many of these people are going to be in the woods and fields that if I were a hunter, I would give it up!

For those that are off the target board, a boresighter can get them there very quickly. This year, I gave Laserlyte's Kryptonite Laser Bore Sighting System a good workout. I've reviewed several Laserlyte products in this column in the past, all positively and the Kryptonite System does not stray from on the Brand's typical upscale quality.

Like other Laserlyte systems, this Bore-sighter inserts in the business end of the barrel, using a series of interchangeable adapters for anything from .22-.50 caliber. That makes it a useful tool for pistols as well as rifles. In addition, there are adapters that can accommodate 12 gauge or 20 gauge shotguns, a real plus for all the pump action slug guns that show up at our sight-in days.

The advantage of the Kryptonite system is its green laser, which, according to Laserlyte, is 100 more times visible to the human eye than traditional red lasers. I don't know how that 100 times is measured, but it is clearly more visible, especially in brighter light. Having both red and Kryptonite systems with me, some fellows at the club assisted in aiming them side by side at increasing distances. The farther out we went, the green laser got the nod. The most common comment was along the lines of "who woulda thunk"? Anyway, that's the way it is. While the traditional red systems work just fine (and are less expensive), if I were to have no laser system at all and I were in the market for one, I'd definitely go the Kryptonite route. On the other hand, if your shooting conditions avail themselves to traditional red laser sighting, then the non-Kryptonite systems put out by Laserlyte are fine as well.

This year, in addition to running the sight-in days, we reinstated a turkey shoot which has not been run at FTRPA in quite a while. We tried to keep it simple, having plaster turkey heads painted in blaze orange at 100 yards or a proportionately larger red balloon heart in a cardboard deer at 200 yards. All shooting was from a standing position. The shooter could choose either target, using any of the following: Rifle shooting .243 or larger cartridge; slug gun using smoothbore Foster

slugs or rifled Sabot slugs; or pistol, having 6" or longer barrel firing a conventional straight-wall centerfire handgun cartridge. Scopes were limited to 4x or a variable set at no greater than 4x.

We kept the entry fee reasonable in relation to the cost of a turkey prize, worrying just a bit about a handful of named IHMSA shooters who could wipe us out and send us deeply into the red. Nevertheless, we ran the event anyway; none of the "dreaded" good shooters showed and very few entrants hit the mark. Most of the turkey heads that were destroyed were by us crew members, practicing when things got slow during the day. I even hit a few myself.

For slow time, most of us bring something to shoot ourselves and I find this is a great time to get some sight settings, especially on guns that I haven't shot in quite a while or new loads for other guns. It's been a couple of years since I mounted a scope on my S&W Model 629. This 44 Magnum revolver with its 8-3/8" barrel was the first gun I ever shot in IHMSA competition, firing Big Bore and Field Pistol, an 80 round day that showed me the way toward more suitable IHMSA cartridges. For me, it's a fun gun up to about 25 rounds or so and it frequently languishes in the safe for long periods of time between range sessions. I had decided to change the iron sights to glass, mounted the scope and then hopped onto another project, never getting it sighted. So, during a lull in the action, I heated up the barrel pretty well with both full house loads and many more tempered to about 44 Special power. The reduced loads will be suitable for Field Pistol. I haven't shot Field Pistol Any-Sight in some time and am looking forward to getting back in that game next year.

In addition to an assortment of other guns, I also brought out my .17HMR outfit that I described over June and September last year. Since my last outing, I've accumulated some more loads beyond the eight reported. Included were Winchester's 17 grain V-MAX and Hornady's 15.5 Grain NTX. These two were brought to the sight-in days, just for fun.

My first thing was to see where they were hitting. Since wringing out the eight loads reported in September, I had not changed my last 100-yard zero. Five shots of each load printed sub-MOA groups, both slightly to the right of dead center aim, the NTX holes being slightly lower and a bit more open (still, less than an inch center to center), not surprisingly, the NTX bullets, being lead free and naturally weighing less than more traditional lead-based bullets. Even in a mild wind, 15.5 grains of anything is subject to more movement. With just a few clicks, I brought the Winchester 17 grain V-MAX load directly on target. Since the wind was a bit erratic, I decided to go my next route with the heavier bullet.

Now the really fun part began. I took the outfit to the turkey shoot position. Although not qualified for the official shoot since it did not meet the .243 caliber minimum, hitting a few heads from an offhand position was exhilarating. No, I did not hit every one; in fact, had I been following the official entry rules that allowed only three shots, I would have gone broke. But enough bullets met their intended target. In a few cases, I barely nicked the head and just like larger bullets that found their plaster-of-Paris mark, a chip was removed. However, the V-MAX bullets that found a solid mass powdered the head spectacularly, as a varmint bullet should. As I said, this was a lot of fun.

Looking back over my stats in last year's shooting matches, I just about held my own in Sporting Clays and took a real nosedive in CMP. About the only area where I made some headway is Big Bore Any-Sights Half Scale. I finished the year with two 38s in December and a solid AAA classification. Better, I even know why they weren't both 40s.

I put my toes in the Half-Scale water several years ago with my regular Big Bore 7mm TCU outfit. While some may subscribe to the adage that there is no such thing as too much gun, this is really overkill for the task at hand in Half-Scale. Keeping my ears to the ground, the wisdom at the time pointed to the 22 Hornet and I then acquired a 14" barrel for my T/C Contender. Using the same loads I had been using in my 10" Field Pistol barrel in 22 Hornet, I tried these 55 grain bullets with abysmal results. The bullets would destabilize, especially past 150 meters. I tried adjusting the powders, but in some cases, I couldn't even hit the target board at 200 yards even if I got reasonable turkey groups at 150 meters.

I've never slugged this barrel, but being of modern manufacture, I'd guess it to be 1:12 twist or 1:14 at the outside. To my knowledge, only some very old 22 Hornet barrels might be found in 1:16. Even at 1:14, a standard 55 grain FMJ should be okay, but in this barrel, it is not so. Unless a bullet is a flat-nosed cylinder (a la wadcutter), some twist rate data are in the realm of dark art, at best. We usually relate appropriate twist rate with bullet weight alone. However, bearing surface and overall length of the bullet are just as important. If the ogive is gradual as opposed to sharp, the bullet will have a longer overall length and a shorter bearing surface. Rather than dwell on the issue, I decided that the most expeditious thing to do was go to a lighter (therefore shorter) bullet.

Contemporary offerings of loaded 22 Hornet ammunition from the Big Three (Federal, Remington and Winchester) have bullets ranging from 30 grains to 46 grains. The only bullet weight common to all three is 45 grains. So that's where I started,

with a Winchester Super-X. Returning to the range, as expected, I had absolutely no problems with stabilization. So I began handloading with bullets more appropriate than 55 grains. While I'm guessing that I could have been successful with 50 grain or even the less ubiquitous 52 and 53 grain bullets extant, I decided to go the other way on weight and honed in on 40 grain bullets, especially Nosler's Ballistic Tip and Sierra's BlitzKing. To date, these two bullets are working fine and wring out all the accuracy of the T/C Contender barrel when loaded over 12.5 grains of Hodgdon's Li'l Gun powder.

As far as Li'l Gun is concerned, it is the only powder I currently use for the 22 Hornet and that's the only single-cartridge powder on my bench. I've always preferred multi-purpose powders, ones that can be used for a variety of loads, but Li'l Gun, originally developed just for the .410 Bore Shotgun, has proven to be a superb powder in the 22 Hornet. I was first advised of this by Chris Hodgdon shortly after Li'l Gun was introduced and my enthusiasm is mirrored throughout website blogs and other sources. It is so good that I abandoned my multi-purpose powder philosophy to make this one an exception.

Some shooters have asked me as to the adequacy of 40 grain bullets in Half-Scale. While I know this weight to be theoretically marginal for the rams, I have yet to ring one. True, there has been a skipped heartbeat or two between the shot and the hesitant topple, but in the end, all my hit rams have fallen. I may try some 45 grain bullets in the future since I have them on hand, but the 40s have been adequate thus far.

Earlier, I had mentioned that I knew why I had blown perfect scores. In my first relay, two turkeys avoided the Hornet projectile due to vision issues. I normally shoot extended handguns with my cross-dominant left eye. I just had some focus issues on this day and I saw slight doubling of the very thin reticle of the scope on the first bank of turkeys. Add to this the fact that the turkey targets were half in sun and the other half in shade and my slowness in switching eyes and my score was limited to the attained 38. By the time the targets were reset, I made the decision to switch to my right eye and the difficult reticle and poor lighting were now manageable.

On my re-entry, I lost the fifth pig of the first bank by pulling the shot. I thought I was running out of time and rushed the shot; as typical, I had plenty of time and I just blew it for nothing. I was getting tired and subsequently sloppy on a second bank turkey, setting my ceiling and achievement at another 38 score. If I can just be more

careful during 2011, I'll be shooting 40s and make INT in this category. All in all, I like this Big Bore Half Scale event and the 22 Hornet is a superb cartridge for it. It's accurate, has sufficient knockdown power and is gentle on the shooter. There are good choices in bullets and at least one very superior powder. Who could ask for more?

# Physically Challenged Report

by Warren Alkire

I'm currently working with a shooter to find a suitable adaptation to a disability that has developed. The challenges involved in coming up with a suitable adaptation are illustrative of the purposes of the Physically Challenged program and the workings.

The guiding principle in designing a suitable adaptation is the mission statement of the Physically Challenged program: "The mission of the Physically Challenged Program is to give a physically challenged person whatever is needed to compete with the able-bodied person - no more and no less."

This particular shooter is a long time IHMSA shooter who shoots from the traditional Creedmoor position. The disability that has developed prevents the shooter from being able to use the leg against which the gun rests. Keeping in mind the mission statement of the PC Program, here are some of the thoughts for developing a suitable adaptation.

A "replacement leg" should have as many of the same characteristics of the leg of an able-bodied shooter. This includes dealing with bracing the gun against a slant and the susceptibility of the leg moving in a strong wind.

An able bodied shooter has the advantage of using the leg muscles to control the leg against which the gun is braced. An adaptation for a physically challenged shooter will need to provide a substitute for the control provided by the able bodied shooter's leg muscles.

The device for providing a "substitute leg" should not go so far as to be the same as a rest like a sandbag on a bench. This would be providing more than the able bodied shooter.

The adaptation may have to change as the disability worsens. (This particular shooter's disability has the potential of becoming more of a physical challenge.)

The shooter and I as well as some of the experienced disabled shooters have been kicking around ideas and are still working on the adaptation. One thing I have learned is that many of these adaptations may vary from individual to individual depending on the nature of the physi-

cal challenge. I've also seen that there is a lot I don't know about medical conditions. Fortunately I go to church with my personal general practitioner so I have an opportunity to ask for general information medical conditions. It is also why we ask for a doctor's statement for the particular physically challenged shooter. This helps the PC program understand the physical challenge and documents the challenge for which the adaptation is authorized.

I hope this "case study" gives you a better idea of the goals and workings of the PC program. If you or a shooter you know can benefit from a Physically Challenged card, please have them contact me. We can work together to help this shooter continued to enjoy IHMSA shooting.

## IHMSA teaches Great Personal Goals

## DECOT offers all new "Revel" Sport Glasses

FOR 60 YEARS DECOT HY-WYD SPORTGLASSES HAS SET THE STANDARD FOR SHOOTING EYEWEAR.

Since 1949 Champions have trusted Decot to provide the highest quality optical products and customer service in the shooting industry. The "Revel" is a continuation of that same high standard in design and function. The narrow lens shape combined with the wrap and close fit to the face provide a comfortable fit without fogging, a problem often associated with other wrap designs. With several models

to choose from you will find exactly what you need to meet your needs. All frame styles have interchangeable lenses. The Classic Hy-Wyd and International also offer an optional Hy-Lc adjustable bridge. We offer over 40 custom tints to meet every individual need. Rx lenses are available for all frame styles.

Don't settle for less... your eyes deserve the Original and the Best... Decot.

# Steel Target Maintenance

The following article was originally published in the December 1, 2010 edition of the Shooting Wire and is reprinted here with permission.

## Steel Target Maintenance

*Editor's Note: Today's timely maintenance information comes to The Shooting Wire from MGM Targets. Mike Gibson offers some thoughts on how to make your steel targets last longer and perform better.*

Someplace back in time, maybe 50 years ago, U.S. Steel developed a product affectionately known as T-1, designated by the ASTM (American Society for Testing Materials) as A-514. Sometime after that, shooters decided it was a great steel to use for targets. It did a great job then, but there are better products out there now. The catch is, virtually all of them are heat hardened steels, so there are some complications related to repairing them.

The easiest and best way to repair damage to steel targets is to purchase steel that isn't easily damaged. Pretty basic, but frequently overlooked while trying to save a relatively inconsequential amount of money. That's why we at MGM Targets use the 500 Brinell hardness steel (with the exception of our .22 targets) on everything we sell. AR500 plate can range in hardness from 460-530. At MGM we only accept steel rated 495 or higher.

If your organization has old steel, like most do, we hope the information that follows will help you make better repairs until you can replace the old stuff. If you have any questions, please feel free to call us at 888-767-7371. We'll be glad to help in any way we can.)

One of the most misunderstood, or overlooked factors impacting target life is heat. Virtually all target steel in use today is "quenched and tempered", meaning that at the time it is rolled (at the mill) it is heat treated. The chemical content of

the steel certainly plays a big role in target life, but any heat applied after the mill heat treatment will adversely affect the life of your targets. This stuff isn't mild steel, so you can't treat it as such.

There are some manufacturing processes that affect hardened steel during fabrication. The first thing that comes to mind is the cutting process. The hardened steel cuts nicely with an oxy-acetylene torch, but the heat that is put into it when the torch travels at 30-40 inches per minute is significant. At MGM we cut all of our steel with a laser. The heat affected zone is about .0005" or about the thickness of two sheets of paper and basically only at the extreme edge of the target. You'll never notice it under pistol fire, but it can be seen to an extent when you begin to hit the edges with high power rifle rounds.

If you have to repair cracks, our recommendation is to use the edge of a grinder to grind the crack out, all the way to the bottom. You may need to grind some from both sides, rather than all from one side. If you don't remove the cracked material, and just weld over a crack, the life you'll get out of the repair will probably be half (or less) than if you do it right. It is unreasonable to think that your repair will never crack again. You have a heat treated hardened area, coupled to a chemically hard but soft area (softened by the heat you introduced into it), coupled to a soft weld area. "Ductility" is the technical word describing the rates with which metals flex or bend. The ductility of the three areas of your repair is all different. You WILL get another crack there. The only question is, when? If you are the person who did the welding, don't take it personally. Without the technology, welding facilities, (and expense) of NASA, everyone should expect a new crack at some point in the future. Like death and taxes, it's inevitable.

When you weld on any heat treated material, use multiple small, hot beads, rather than a large one. The object is to limit the amount of heat you put into the steel as much as possible. Let the first weld get cold enough to touch before you make the second pass, or before you make a pass on the other side. This will minimize what is technically called the "heat affected zone", and consequently minimize the amount of temper that is removed from the parent material. Heat on mild steel has very little effect but it is critical when you are working with heat hardened steel. If someone delinquent or intentionally shoots a hole in one of your targets and you have to fill the area, you've got two real problems. First, all of the area surrounding the weld repair (or plug) will be softened because of the welding heat. Second, your welding filler material will be the same hardness as mild steel. The trouble with this is you have a spot of 135 Brinell hardness on your target. This is going to significantly crater the first time it sustains a direct hit from a .38 Super, or something similar. Your welding supply store may be able to suggest a much harder filler metal than the traditional E-7018 or E70S-6 wire, but it's never going

to be as hard as it was before the repair.

You half the replacement cost of the targets, or more, especially if you have to pay freight there and back. Additionally, they usually need to know specifically what type of steel you have and what you want done to it. They might be able to recommend a generic treatment, but it is a safe bet they aren't going to guarantee anything without knowing the specific chemical composition of the material. If you are the original purchaser of the material, you can probably find that out from your supplier. If the purchaser has moved on and you can't locate the source of the steel you may be out of luck.

If you want to really lengthen the life of your steel target make sure you turn your target as soon as it gets a curve in it. Hard steel will go convex (bulge toward the shooter) soft steel will go concave (bulge away from the shooter). Turning your target will double the life expectancy of a steel target. TURN YOUR STEEL. We don't have all the answers, but we'll be glad to help you to the best of our ability. Just give us a call at 888-767-7371.

Mike Gibson

Gibson is president of MGM Targets of Caldwell, Idaho [www.mgmtargets.com](http://www.mgmtargets.com)

## Sturm, Ruger & Co., Inc. Listed in Forbes Magazine

Forbes magazine has named Sturm, Ruger & Co., Inc. (NYSE: RGR) one of "America's 100 Best Small Companies" in 2010. The list appeared in the November 8th issue of Forbes.

"We are proud to be recognized by Forbes as one of America's 100 Best Small Companies," said Ruger CEO Michael Fifer. "We owe a great deal of thanks to our loyal customers and dedicated employees for contributing to our success. Because of our innovative product introductions and continuously improving American manufacturing, we have seen our sales growth and earnings per share improve significantly over the last four years."

The Forbes list of 100 Best Small Companies in America only considers companies that have been publicly traded for at least a year, pull in annual revenue between \$5 million and \$1 billion, and boast

a stock price no lower than \$5 per share. Forbes also factored in the stock performance of each company compared with that of its peers. The rankings are based on earnings growth, sales growth and return on equity in the past 12 months and over five years. During the past five years, Ruger saw earnings growth of 470%; sales growth of 86%; and annual return on equity increase from 4% to 34%.

"Ruger's award winning products include the LCP™ .380 Auto Pistol, the LCR™ .38 Special +P Revolver, and the SR9c™ Compact 9mm Pistol. All of Ruger's rugged and reliable firearms are made in America in manufacturing facilities in Newport, NH and Prescott, AZ. For more information on the extensive line of Ruger firearms, visit [www.ruger.com](http://www.ruger.com).

As always, thanks for your continued support!

# Secretary/Treasurers Report

Secretary/Treasurer's Report January/February 2011  
By Warren Alkire

The report for this month is short. Look elsewhere in this issue for information about the 3 new trial categories grouped under the "Practical Hunter" banner. The Board votes on this issue are below. The Board is interested in seeing how this generates interest and more importantly members and entries during the 2 year trial period. These are trial categories that will no longer be offered after the end of 2012 unless they are made permanent. I hope that experiences with these categories in a trial format will yield suggestions for improvements in the definition of these classes if the IHMSA decides to make these classes permanent.

Publication deadlines and time for closing out our books for the end of year do not align to let us publish the end of year financial report in this issue. As such, we'll publish the end of year financial report in the next issue.

I hope everyone is getting time to devote to those long term silhouette tasks such as brass preparation, new load development, mounting sights, etc. during this time of year when most ranges are not offering matches. I wish everyone a happy new year in your lives and in shooting silhouettes.

## Rule Change Notice

In accordance with the need to periodically review and amend the price cap to insure the integrity of the production class as well as assure availability of suitable guns to shooters, the IHMSA Board of Directors has voted to adjust the price cap on the Manufacturer's Suggested Retail Price (MSRP) on the Production Class Air Pistol to \$375 U.S. This rule will take effect immediately upon being published in the November/December 2010 issue of the *IHMSA News*.

Effective immediately, Section VI: Handguns, Part A. Production, Paragraph 19 of the Rule Book is as follows:

"No Production AIR Pistol shall have a manufacturer's suggested retail price greater than \$375.00 U.S., based on MSRP. This cap shall be reviewed and amended for inflation as needed to insure the integrity of the production class.

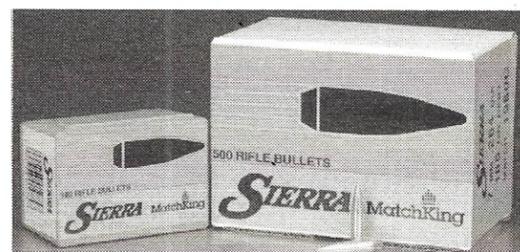

"No AIR Pistol will be re-categorized solely on the basis of movement in the MSRP or the price cap. The re-categorization of an AIR Pistol will require a vote from the board after a recommendation from the evaluation committee. The list of approved production AIR Pistols is available on the IHMSA web site or from the evaluation committee."

Note that this rule will apply to newly introduced air pistols and current AIR Pistols that were not previously classified as Unlimited based on the MSRP and price cap in effect when the pistol (or Production Pistol category) was introduced. As the rule states, "No AIR Pistol will be re-categorized solely on the basis of movement in the MSRP or the price cap." A pistol will have to be re-evaluated by the evaluation committee and voted on by the Board to change from the Unlimited to Production category.

Part of the reasoning for setting the current amount is based on the planned price point for a production class pistol with competitive sights that one of the airgun manufacturers is planning to introduce. This was compared against the MSRP of the most common production AIR Pistol, the Daisy 747, and the price of the aftermarket sights commonly seen on this model in competition.

### 2011 New Product Announcement

7mm (.284 diameter)  
180 grain HPBT MatchKing (Part # 1980)

Sierra is pleased to introduce the newest member of our MatchKing line; the 7mm 180 grain HPBT MatchKing. In response to requests from top level F-Class shooters, Sierra has designed an all new MatchKing to provide a higher weight/higher B.C. alternative in our 7mm line. This bullet's 12 caliber secant ogive and lengthened boat tail make it the perfect choice for the discerning 7mm long range shooter. Sierra recommends at least a 1 in 8 inch twist barrel to stabilize this bullet.

Description	Part Number	Box Quantity	Grain Weight	2011 Retail	Ballistic Information

# IHMSA NEWS - SECTION B

January-February 2011

## MarksmanSHIP Competitions

By Joe Lassiter

I hope this edition finds you all well. As I write, I sit wishing 10 inches of "global warming" would melt away soon so I can get in some range time. I did not manage to get any entries shot this year due to a busy schedule but hopefully 2011 will be different.

We did receive some entries this edition for the Avanti Trophy and the Burris Cup and I was pleased to see a few roll in before the deadline.

Steve Martens and Marcus McClery out in Minnesota shot some great groups with their airguns. They were each shooting a Daisy 747 with JSB pellets. As I measured the first target I knew this would be a close contest. Steve's target measured .476", I was not surprised as Steve usually sends in some really nice groups every year. I measured the target which Marcus shot and did a double take as I couldn't believe how close they were. I measured and re-measured each target as I always do, just to make sure, before I put the official measurements on the target. I finally was satisfied that the measurements were correct and that Marcus's target measured .470"! That is some great shooting fellas!

Joe Coleman out in Texas sent in some ammo testing groups from his FA revolvers and to say they were impressive would be an understatement. Joe managed an impressive .590" group with Eley Team ammo from his FA903. His FA555 printed a dandy group of .635" with RWS ammo. That is some great shooting from a wheelgun Joe!

As usual I will be wrapping up the competitions in March and ordering the trophies. There may be a few stragglers that make it in under the wire for 2010. I hope that I am able to test more loads in 2011 and get a few more submissions. I have decided to leave the rules as they are for another year at least. Get out and shoot some groups! Until next month, be safe on the range and take a kid shooting.

### Format for the 2011 IHMSA MarksmanSHIP Competitions.

#### The Burris Cup:

Scoped .22 Long Rifle caliber handguns only. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a Ransom Rest, vise, or any other mechanical clamping device. Lying on your back in a freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns set up for creedmoor to better compete.

#### The Weaver Trophy:

Scoped centerfire handguns. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a Ransom Rest, vise, or any other mechanical clamping device. Lying on your back in freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns set up for creedmoor to better compete.

#### The Merit Challenge:

Centerfire handguns with iron / open sights. Your best 5-shot group at 100 yards or meters. Groups must be fired from an IHMSA legal freestyle position. No benchrest or artificial support allowed.

#### The Daisy Avanti Trophy:

Air Production guns with Iron / Open sights. Your best 5-shot group at 18 yards. Groups must be fired from an IHMSA legal freestyle position. No benchrest or artificial support allowed.

**General Rules:** All entries must be shot with IHMSA legal guns. Production, Revolver, and Unlimited guns are allowed in the Burris, Weaver, and Merit classes.

**Witness:** Winning groups must be witnessed by an IHMSA or NRA member. Eligible winning targets must be signed and dated by the shooter and witness. Also, please include the shooter's IHMSA number and the witness's IHMSA or NRA number by their name. A witness is not required to enter but is required to win.

**Targets:** Targets submitted must contain no more and no less than 5 shots in each bull zone.

Send in your best group. Please include all the info you can especially gun make, sight type and make, caliber, and range conditions. You may send load data if you care to share it with us as well. Send your targets to:

Joe Lassiter

# Records Program

## AIR Records

by Steve Mooney

We have a new member to welcome into the AIR Pistol Records Program. John Anderson of Oklahoma shot a great personal best in USIS of 34. He topped his previous best by 8 targets, great shooting John. I'm sure we will be seeing more entries from him in the future. I have been waiting to hear from those guys up in the "frozen north" also known as Minnesota. We usually get some good scores from them once they move indoors and start shooting the air pistols. Seems that our Vice President Steve Martens hasn't lost his touch. He posted some record worthy scores in S, USIS, and a couple of great Aggs as well.

If you have qualifying scores, air pistol events, even some interesting stories or information about air pistols, send them in.

Please send any record program entries to [mooney1@whidbey.com](mailto:mooney1@whidbey.com), or mail them to Steve Mooney, 4910 Lakeside Dr., Langley, WA 98260. If you want to chat, you can also phone them in at: 360-321-4513.

Send \$3.00 to Lorene Thompson, P.O. Box 95690, South Jordan, UT 84095-5690 for each 100 Club, 60+ Standing Aggregate, or 40x40 pin. 100 Club and 60 Club pins are dated.

## Big Bore Records

By Joe Cullison

First off, I must apologize to Richard Deviers (VA). Richard sent in his 100 club scores and I misplaced the paper for a couple of months. It may be late but still great scores and worthy of mention and praise. Richard shot a S-24, P-37 and a U-39 for a 3-gun score of 100. This also gets VA on the state score list with one point. Great shooting Richard and please forgive me for taking so long to get it posted.

Good thing I screwed up with Richard's scores or I would not have anything to talk about.

There is still time to send in any scores from this year, so please let me know and I will get them posted. I know from reading the *IHMSA News* that there are more qualifying scores out there but I need someone to submit them. I just can't go through every edition adding up everyone's scores to see if they make it.

Since there is nothing much going on I will post the instructions for making the Big Bore Records Programs.

There are 5 categories in the BBRP, these are:

1. 30+ Standing which means just that, shoot a 30 or better Standing Open Sight score and you are qualified.
2. 35+ Unlimited Standing is the same way, shoot a 35 or better score in an entry marked as Unlimited Standing (this can be shot with open sights but is usually done with a scope).
3. 60+ Standing Agg is the total of the Standing and Unlimited Standing scores, 60 or better qualifies.
4. Presidents 100 club also known as the 3-gun aggregate. This category uses the scores totaled from 3 guns, Standing and the highest scores from 2 guns in Production, Unlimited, Revolver, or Unlimited Standing.
5. Presidents 140 club also known as the 4-gun aggregate. This category uses the scores totaled from 4 guns, Standing and the highest scores from 3 guns in Production, Unlimited, Revolver, or Unlimited Standing.

The State totals for 2010 are: OR-10, CA-10, OH-5, CO-5, NC-3, GA-3, IN-4, WA-2, TX-2, WY-2, MT-1, MI-1, AK-1, VA-1

Please bring at least one friend or acquaintance to every match. Together, we can keep IHMSA growing.

Please forgive me if I have left anyone out or made any other errors. Send me the information and I will make it right as soon as I can.

Thank you for your support of the BBRP.

Send entries to Joe Cullison, 19720 Mahogany St. Bend, OR 97702 or to [junclejo@aol.com](mailto:junclejo@aol.com). 541-317-8801 evenings. Thank you.

## Half-Scale Records

By Jim Harris

It's hard to believe it is 2011!! Amazing!

I expect this to be the year-end wrap-up for the Half and Fifth-Scale records. Shooting has quieted down for the winter in many of our clubs, and the few still shooting regularly, I'm familiar with. Hopefully I've corrected most of my errors in tabulation throughout the year!

Special records of note, coming from Fifth-Scale - Dean Grua shot an Open Sight 80x80, Harry Sharp shot an Open Sight 60x60, and Jerry Ray shot a scoped UAS 80x80 - all new World Records! Amazing shooting and deserving congratulations.

Overall Man Of The Year again goes to Scott Mann for his versatility spanning both Half-Scale and Fifth-Scale categories - while using only iron sights. In Half-Scale, Scott posted an Open Sight 60x60, SIXTEEN 40x40 Open Sight, eight UAS 40s (2-fers from Open Sights), TWO 80x80 Aggregates and the top 60-round match Aggregate of 118/120. In Fifth-Scale, Scott managed 2 Open Sight 40x40s, and one UAS 40, plus entered the Aggregate with 78. His total perfect scores with Open Sights was 19 this year, bringing his career total to 140 perfect Open Sight scores in Half-Scale and Fifth-Scale! Congratulations Scott!

Runners-up with honorable mention are:

Jim Fields in Half and Fifth-Scale UAS categories - one 80x80 and eleven 40x40, plus five 40x40 in Fifth-Scale UAS.

Paul Habig with an incredible ten 40x40 in Fifth-Scale UAS.

Dean Grua with two perfect Open Sight Half 40s, one Half UAS 40 and a perfect 80 Agg - plus the aforementioned Fifth-Scale Open Sight 80x80, two Fifth-Scale UAS 40s and a very nice 79 Agg - twice!

John Anderson with an 80x80 in Half-Scale UAS, and a 60x60, AND a 40x40! Plus a terrific 70x80 Agg. In Fifth-Scale John also managed one perfect UAS score.

Finally, Mike Abel clawed his way up the Half-Scale UAS 40-round matches to

become King of the Hill with 12 perfect scores, plus a nice 78x80 Agg.

Many other fine scores were posted, and for some of us, there is considerable room for improvement. But I want to commend everyone who tried these demanding disciplines in 2010.

Looking forward to even more fine scores in 2011!

Please contact me with your records entries at (805) 581-0009, [harrisgrp@earthlink.net](mailto:harrisgrp@earthlink.net), or snail mail to 1567 Bridget Ave., Simi Valley, CA 93065

**KENTUCKY**

**CRITTENDEN, KENTUCKY**  
**Northern Kentucky Straight Shooters Assn.**  
**September 18, 2010**  
**by Penny Wichman**

Walt and Joe did a fine job of running the match again this month, as our regular match directors had to work again. We didn't have many shooters as this was not our normal Saturday for our match. We had to reschedule due to range conflicts.

Walt was the only brave open sight shooter and missed only one turkey for a fine 39. Joe Puffert led the way in UAS with a 40x40 and 5 shoot-off targets. In Half-Scale, Walt knocked down every one for a perfect 40x40 plus 7 shoot-off targets, giving him one leg into INT.

Walt continued his run with a perfect 40x40 in Small Bore UAS-INT. Joe Puffert also had 40x40, but knocked down only 5 shoot-off targets to Walt's 6. Larry Egan took the honors in UAS-AAA with a 34. Both Walt and Joe shot our Fifth-Scale targets this month, with Walt knocking down 36 and Joe knocking down 28 on his very first try at the little critters.

**Big Bore Results:**

U-AAA	Walt Sweet	REM7INT	39+2
UAS-INT	Joe Puffert	WICH7IN	40+5
UAS-AAA	Larry Egan	XP7BR	34

**Half-Scale Results:**

UAS-INT	Walt Sweet	TC6x47	40+7
---------	------------	--------	------

**Small Bore Results:**

UAS-INT	Walt Sweet	ANS	40+6
UAS-INT	Joe Puffert	ANS	40+5
UAS-AAA	Larry Egan	EXEM	34

**September 26, 2010**

Walt Sweet was our Big Bore winner this month with a UAS-INT 40x40 plus 6 shoot-off targets. Tom Wood also had a 40x40, but knocked down only 5 shoot-off targets. Tom came back and shot another 40x40 as a reentry. Joe Puffert let one ram skip by for a 39. I had a poultry problem this month, letting one chicken and 3 turkeys slip by for a 36, and Larry Egan also got a slow start missing a few chickens, and a couple of turkeys for a 34. Walt let one ram and one turkey slip by in the Half-Scale targets for a 38.

I was lucky enough to get this month's high Small Bore score with a 38, even though it wasn't one of my best. I guess everyone else had some problems with the lighting, too. Walt was the only Fifth-Scale shooter and managed to knock down 32. The clouds and sun and shadows definitely had an effect on the little ones.

**Big Bore Results:**

UAS-INT	Walt Sweet	TC6.5x57R	40+6
UAS-INT	Tom Wood	SAV708	40+5

---------	------------	--------	----

**Small Bore Results:**

UAD-INT	Joe Puffert	ANS	35
UAS-AAA	Walt Sweet	ANS	32

**October 9, 2010**

Once again we had to call on Walt and Joe to take care of running the match. We didn't have many shooters, even though it was a pretty nice day. Walt started right off with a 40x40 and 8 shoot-off targets to lead the way in UAS. Joe let one turkey and one ram slip by for a 38 and Larry Egan had a little trouble with the turkeys and ended up with a 35. In Half-Scale, Walt had a fine 37, missing a chicken, a turkey and a ram.

Joe and Larry were our only Small Bore shooters, and each had 37's. There were no Field Pistol or Fifth-Scale shooters.

**Big Bore Results:**

U-AAA	Walt Sweet	REM7INT	40+8
UAS-AAA	Larry Egan	XP7BR	35

**Half-Scale Results:**

UAS-INT	Walt Sweet	TC6x47	37
---------	------------	--------	----

**Small Bore Results:**

UAS-INT	Joe Puffert	ANS	37
UAS-AAA	Larry Egan	EXEM	37

**October 24, 2010**

We finally had a better turnout this month, and a beautiful fall day for shooting! It was great to see our state director, Greg Rhineheimer up from Anderson County. Dean Grua was finally able to get back in town for a match, and shot a couple of guns even though he had just gotten off work and his back hurt. Bob Baur came out

after missing a couple of months, even though he was supposed to be on his way to the hardware store to get supplies to fix his cistern.

We had three 39x40's this month, with Tom Wood knocking down one more shoot-off target than Joe Puffert. Dean Grua also had a 40x40, but didn't shoot any shoot-offs. I had a 38 in UAS-AAA, missing only 2 turkeys. I better practice my turkeys for next year. Larry Egan also had a turkey problem and ended up with a 34. Bob Baur shot Big Bore for only the second time and bettered his first score with a fine 18.

Greg Rhineheimer was our Small Bore leader with a 40x40 and 3 shoot-off targets. That gives Greg his second leg into UAS-INT. Congratulations, Greg. Dean Grua also had a 40x40, but did not shoot shoot-off targets. I am still getting close to that elusive 40, knocking down all but number 8 ram. Greg also got a leg into US-A with a 15.

In Field Pistol, Bob Baur shot his highest open sight score, jumping to P-A for the day with a leg into AA. He also got his second leg into PAS-A.

**Big Bore Results:**

**October 31, 2010**

Our last match of the year. Seems like it went by so quickly. We are planning next year's matches and will be shooting the last Sunday of the month again next year. Our Saturday matches will be either the second or third Saturday, depending on range availability. Thanks to everyone who shot with us this year. Hopefully you will be able to join us again next year. We will be shooting all 5 disciplines - Big Bore, Half-Scale, Small Bore, Fifth-Scale and Field Pistol.

Believe it or not, we had no 40x40's in regular competition this month. Tom Wood won Big Bore UAS with a 39. Walt Sweet had a 38, Joe Puffert had a 37 and I had a 36. Tom was out to prove that it really could be done and knocked down all 40 with a re-entry. Bob Baur shot Big Bore again and knocked down one more than last time. Way to go, Bob. Walt was our only Half-Scale shooter and knocked down 38.

My dad, Joe Puffert and I were the only Small Bore shooters. I knocked down 38 (missing 2 turkeys) with 4 shoot-off targets, but dad had a little trouble with the scope and only got 37.

In Field Pistol, Walt Sweet had a 21 in PAS-AA, and Bob Baur had another fine P-A score of 19.

I hope everyone had a great Christmas and a Happy New Year. See you back in Crittenden for our first match of the year on March 27, 2011.

Last match of the year was well attended. Weather was warm but no wind most of the day. I need to correct a score that was shot at our last match. John Blue from Oklahoma shot a 39 in UAS Small Bore, not the 35 I reported in my match report. Sorry for the mistake John. Also thanks to the Barrett's who drove 4 hours to shoot with us. Stuart made it into INT Class in Big Bore UAS. Congrats to Stuart.

Hope everyone has a great winter and hope to see you next year, starting in March. Now to the scores.

**Cherokee Gun Club**  
**November 10, 2010**  
**by Ron Dixon**

Our November match was a pleasant surprise. The weather was tolerable, a mite chilly but still quite bearable.

One part of the pleasant surprise was the attendance of Phil Owens and Arty Hausmann. These gentlemen shoot Big Bore with us at Lincolnton, and we have been trying for a couple of years to get them to come to Cherokee and try Small Bore and Field Pistol at our range. Hopefully they were inspired rather than humiliated and they will return to try it again.

Another surprise was the return of Mark Cederquist. It is always a good day on the range, when Mark comes to play with us.

The big surprise for the day was the 21 shooters who came out for a November match. I was counting on 15 shooters and expecting 10. So the 21 was a great surprise. And we fixed lunch for 15 so it all got gone and the way the crock pot got scraped it must have been pretty good. There wasn't enough left for the dogs to lick out.

Four UAS shooters hit all the targets and Richard Pickering was the lucky shooter who won the shoot-off. Robert Walker had an excellent Standing day. He was trying out he new peep on peep sight arrangement and with some re-entries he hit 29x40 with his Field Pistol Production gun and a 30x40 with his Small Bore Standing gun. Now that is some great shooting.

For the last match of 2010, we had great weather. We started out wearing our winter coats and ended up in shirt sleeves. To keep warm early in the morning, some shooters would step into the sun. The turnout was small, members and 1 guest, Mark Capron, but we had fun which is the main thing.

Diane was not able to be with us and run the match as she was recovering from another surgery. Thank you for everyone who has kept her in their prayers. She is doing great and, as always, has a great attitude.

The target setters, Adam and Dallas, had a much easier time than previous months (championship matches) and, once again, did a great job. Everyone appreciates them coming out.

I hope that everyone had wonderful holidays and we hope to see all of you next year. Shooting steel is better with friends.

We had our last match for the year and I think everyone had a good time at the match. The weather was almost perfect and the wind was calm for a change. Several shooters did well and some of us were not too fortunate (myself included). With this being the end of the season, I want to thank everyone who came

**REQUEST FOR NOMINATIONS**  
Director, Region 3 for IHMSA, Inc.

The position of Director of Region 3 is currently vacant. This means that Region 3 shooters are without representation on the IHMSA Board.

This is a request for nominations for individuals to serve as the Region 3 Director. If there is more than one nomination, a ballot will be placed in the IHMSA News.

Any member in good standing, who is a bona-fide resident of the Region for which they nominate, is eligible to stand for election. A bona-fide resident is someone who has resided in the particular Region for a period of not less than six months immediately prior to the election.

Members that have been residents of Region 3 for at least 6 months and who are interested in serving as Region 3 Director are encouraged to nominate themselves. All nominees require the endorsement of 2 other IHMSA members. Use the following form or a facsimile to submit the nomination.

Nominations should be sent to the Secretary/Treasurer. Candidates will be declared in the IHMSA News and a ballot will appear if more than one nomination is received.

Each nominee may provide a statement of claims of not more than 500-words that states why he/she should be elected to the office for which he/she is being nominated. Said statement of claims will be published in the IHMSA News if an election is required. Candidates should submit the statement of claims with their nomination.

**Nomination for the Office of Director, Region 3 for IHMSA, Inc.**

\_\_\_\_\_ do hereby declare my intention to stand as a candidate for the election of the office of Region 3 Director for IHMSA, Inc. I hereby endorse that my name be placed in nominations for said office, and attest to being a member in good standing of the IHMSA, Inc.

Signed: \_\_\_\_\_

IHMSA # \_\_\_\_\_

We, the undersigned financial members of IHMSA, Inc. do hereby endorse this nomination of the above member for the office of Region 3 Director for IHMSA, Inc.

Signed: \_\_\_\_\_

IHMSA # \_\_\_\_\_

Signed: \_\_\_\_\_

IHMSA # \_\_\_\_\_

The bylaws of IHMSA, Inc. require nominations for this office be submitted on this form or a facsimile thereof to Secretary/Treasurer, Warren Alkire, 1917 Shoreline Drive, Abilene, TX, 79602.

out and made the matches the pleasure they were throughout the year. I will probably start the 2011 season with an earlier match in March. Watch the *IHMSA News* for details on this and the rest of the schedule for the next season. Until then, good shooting.

We had a very good day for a match. The temperature was in the 70's after setting a record high 3 days before (92, I think).

We had 2 new guys, a new lady and 3 shooters we haven't seen in a while. Andrew Lowe, one of the new guys, shot a 27 in Field Pistol Production, the highest first time score I remember seeing. For some reason, people had a lot of trouble with their guns with several DNF's.

I want to thank everyone who helped put on the match. Daniel Roller, Perry Brown and I put out the ropes, swingers and Field Pistol chickens on Saturday. Bryce Owens and Daniel put out the mats and chairs Sunday morning. Daniel, Perry and Bryce put things away while finished the bookkeeping.

SOUTH KENT SPORTSMAN CLUB  
AIR PISTOL, BIG BORE, FIELD PISTOL,  
FIFTH-SCALE, HALF-SCALE AND  
SMALL BORE STATE CHAMPIONSHIP  
August 6, 2010  
by Floyd Lober

The Michigan 2010 State shoot went by too fast. We had beautiful weather for the two and a half day event. Just enough wind the latter part of Friday that we set rams full foot and counted our hits. This year's event did not set any attendance records however, with 67 entries. Everyone had a good, safe time.

The 60 round match proved to be tough enough even for us experienced shooters.

A big thank you to our industry friends for their support in donating door prizes. Thanks to Bell and Carlson, Burris, Zero Bullets, Lee Precision, Redding Co., DuraCoat, Brownells, Marbell Gun Sight, Starline Brass, Sierra Bullets, Ruger, Midway Supply, Mossburg Shilen Barrels, E. Arthur Brown Co., KDF, Dixie Gun Works, Hogue Grips and especially Howard Kriss.

More thanks go out to our hard working target setters. Thank you Les Lober, Michael and Cristina Homrich and Austin and Jake Hunter. Good Job! We couldn't do it without the guys who help set up on Thursday, Ray Homrich, Larry Clark, Bill Clark, Rich Sal, Dave Smith, and Les Lober. The sign in and posting were handled by Mary Lober and Ray Homrich. Dave Smith ran the

match, did the lunches and the banquet, and many other duties. Thank you Dave for all the hard work and food.

Most of all we need to hank the shooters who still love to shoot steel and come out for our matches. Thank you all for making this a safe and enjoyable match.

Bye for now and see you all at our next match.

Well, our last match for 2010 is history. Turn out was fair for a holiday weekend and considering the weather. Two days ago it was 90 with dew points in the 70's. Today, sweatshirts weren't warm enough, oh well, that's Michigan weather.

We had three 40's today, Vern Bouws in AIR UAS-INT and both Dennis Nelson and Scott Hardman in Big Bore UAS-INT, great shooting guys. Well this is the end of our 25th year of IHMSA Silhouette, here at South Kent and I would like to give a big thank you to Floyd (Randy) Lober for being our match director during the entire time, as well as putting up with all the BS that accompanies the matches. Hope to see everyone next year. Be safe over the winter.

I would have to say that our extra match of the season was a rousing success. Although attendance wasn't that spectacular, the weather certainly was. Who would have guessed that we'd have a sunny 70 degree day in the middle of November, but there it was. In Small Bore UAS, Dave Calloway scored a 40+10, with Don Leisure just 3 shoot-offs behind him. John Maple topped the Field Pistol shooters and made the 60 Club with a 30 in Production, and a 33 in PAS.

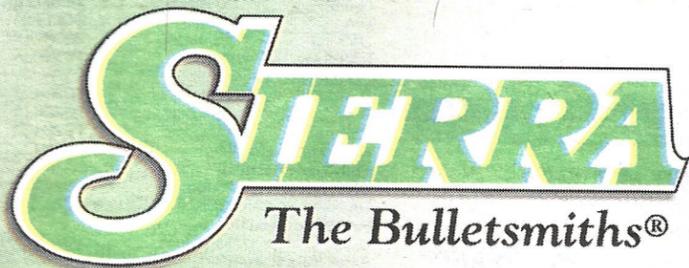

I always look at the last match of the season with mixed emotions. On one hand I won't have

# FOR SILHOUETTE COMPETITION, SIERRA MAKES THE RIGHT BULLET.

**Sierra Bullets are used by handgun and rifle silhouette champions around the world because it's the right choice.**

Whether you prefer MatchKings, GameKings, Pro-Hunters, Sports Masters or Tournament Masters, Sierra bullets have that extra margin of ballistic performance shooters need at any range. Sierra's exacting tolerances assure record-breaking accuracy box after box, and many Sierra bullets are now available bulk packaged in boxes of 500. So when you line up your next shot, you'll be in championship company when you're using the right bullets... Sierra Bullets.

## WORKING UP A LOAD FOR

Now before you think I've gone completely mad, let me explain. I have had many shooters ask me what brand of 22 ammo I shoot in my Small Bore gun and I've seen numerous postings on the various website message boards asking similar questions. What ammo is the most accurate for a Buckmark or a Ruger revolver, etc? If you think there is one brand over another that will shoot more accurately you are correct. The only problem is that it not only depends on the make and model of the gun, but each individual gun or barrel. I have two 10" Thompson Center Contender 22 Match barrels that are both very accurate; however they are the most accurate with two completely different brands of ammo.

The secret to an accurate Small Bore gun is not much different from getting the most out of your center fire gun. It involves finding a bullet and powder combination that it likes the best. Except in the case of your Small Bore gun the ammo is already loaded for you. Now that being said, there was a time back in the day when men braver than I would carefully pull bullets from 22 rimfire cartridges and swap out powder or bullets then gingerly reassemble them, but current IHMSA rules restrict that practice these days. So, the only way to really find out is to conduct some good old fashion scientific "trial and error."

Many shooters are of the opinion that the more expensive the ammo the better the groups it will shoot and in some cases that is true. However, I have found over the years of playing this game that there are many instances where you can get some very accurate results without having to mortgage the farm to buy a case of 22 ammo. I have somewhat of a budget when it comes to shooting and I try to work within my means as much as possible. So the less I spend per round means more rounds to shoot per dollar, which equals much more fun. I have found the best way to approach this "experiment" is to first set some parameters. There are three main factors I consider when choosing a brand of 22 ammo. First is the accuracy in that particular firearm at 100 yds. Second is the cost of that accuracy in relation to all the brands tested. Third is not as important as the first two, but still a factor and that is trying to use similar ammo for multiple guns. Of the six Small Bore categories that I regularly shoot I usually can get by with just three types. For shoot-offs or Regional matches I'll add a fourth.

So let's look at the first two parameters more closely. I always test ammo at 100 yards or meters. That is the maximum distance for Small Bore and that is where you need to see what the bullet is doing. I have found many times that ammo that shoots dime size groups at 50 will sometimes open up to 12" or more at 100. If you're testing at any closer distance you could be just wasting time and ammo. Being somewhat budget minded brings into play the second parameter. I like to test a variety of different brands but still have my budget to think of. This is where you have to make some decisions. How much are you willing to spend and just how accurate does your pistol have to be for our game? If you asked a dozen people you would most likely get a dozen different answers so I will just give you my criteria. I like to do most of my testing with what I refer to as "mid-priced" ammo. I usually avoid the bulk pack bargain basement varieties that most manufactures offer. Mainly because I have found it to be very inconsistent from batch to batch. It might test great at first, but then the next brick or bulk box you buy is very different or you may get a few "fliers" off and on. Although I know of a few shooters that use it, and still do ok with it. I am also too

cheap to shoot the super high end stuff on a regular basis. I have one pistol that groups well with a mid-priced brand, WOLF Target, but produces incredibly small groups with Eley EPS. I shoot the WOLF 90% of the time but for big matches and shoot offs I'll pull out the pricey stuff. So how accurate is accurate enough? If I can find a mid range ammo (\$4 to \$6 dollar for a box of 50) that will consistently give me groups close to 2" at 100 I'll call it good. If it's an UAS or U gun where there is a good possibility of having to "shoot off" then I will also test for ammo that would hopefully get me in the 1" or less range. This will be a personal choice for you based on what categories you shoot and what your demands are. If you are happy with 3" groups and are just shooting the standard Small Bore targets then go with it. If you plan to shoot the "runts" (Fifth-Scale) or get into shoot off situations a lot, then you are going to need to get the most accuracy you can from your pistol. When considering the third parameter I will usually just start my testing of a new gun or barrel with ammo brands that I am currently using in other pistols. If I get acceptable accuracy then that's a plus. If not, then it's back to the drawing board

# R YOUR SMALL BORE GUN

and I start testing other brands and types.

So how does one go about finding the right ammo for a particular pistol? I try and remove as many of the "variables" as possible. Some, but not all, variables can be: wind and weather, gun movement, target visibility, trigger control, and bore condition.

The first item on the list, wind, can be a real accuracy killer. I try and do my testing all on the same day and in the same weather conditions, preferably a nice calm clear day. If you test one brand with a strong wind and another in calm weather, you really can't be sure if the group will be an accurate representation of that ammo. What if you have a great 9 shot group and get a flier, was it a gust wind or the ammo? Remove the variables! Although most rim fire ammo is not real temperature sensitive, extreme temperature changes can affect performance also, so I try and test in weather that is similar to what I will be shooting in. If you do all your testing in the cold of winter, but do most of your shooting in the hot summer months you may get some inconsistencies.

To eliminate gun movement I use a combination of sand bags or an adjustable front rest and a sand bag under the grip. If you use an adjustable rest be sure it has some way to secure the forend of the pistol. Use either a "rabbit ear" type bag or a soft rubber "V" notch to keep it free of any movement. The object here is to remove as much tilting, side to side, and up and down movement as possible. I prefer to totally secure the pistol with sandbags as in the photo. It holds well and allows great consistency from one shot to the next.

For target visibility I recommend mounting the highest magnification rifle scope you own on the pistol with a good solid base and ring system. Since the recoil of the 22LR is minimal a rifle scope can be used and has definite advantages over using open sights or even a pistol scope. Higher magnification allows you to be more accurate in sighting the same point on your target for each shot. I like to use a target that either has a very small dot to aim at or one that has vertical and horizontal lines on it to line up with the crosshairs in the scope. Again, being consistent shot to shot is paramount.

Trigger control can make a huge difference in your ability to consistently obtain the same point of aim shot after shot. Be certain that you are not moving the gun while squeezing the trigger and be very diligent to hold the gun in the same way with as little pressure as possible for each shot. Having a fairly light trigger with little or no creep is a must. I had a friend that was doing some ammo testing on his Contender. He called and said he had tested over ten different types (even some high end brands) and wasn't getting any of them to group much better than 5" to 6" at 100yds. He asked if I would give it a try with my set up. I met him at the range and after the first shot from his gun realized the problem. His pistol had about a 5 pound trigger pull with a lot of creep that felt like dragging a lead brick over cobble stones. We swapped his barrel to one of my frames and the groups immediately tightened right up.

In regards to bore condition, it can be debated for months as to whether or not to clean, how to clean, and what to clean with, for Small Bore barrels, but for ammo testing I am more concerned about consistency rather than method. I will explain the method I use when testing and why I do it. I think, whether you believe in cleaning or not, it is important to start with the same "condition" of barrel with each brand or type of ammo you are going to test. To do this I clean the chamber and bore with a brush and solvent, then run 4 or 5 patches down it. I will do this, keeping the same procedure each time; at the end of testing one brand, before starting to test the next. I then shoot 3 or 4 "fouling shots" with the next brand before putting it on paper for group. Each type or brand of ammo can have a different lube, lead

alloy, plating, etc. and I want to be certain that I am testing just that one type without any residue left from the previous one. I like to shoot at least 10 shot groups as this will give you a very good idea of what you can expect out of that particular brand. If I am testing many different types of ammo I will start off at 50yds. to "weed out" some of the less accurate ones. Then when I have three or four types that have promise, I'll set up and shoot them again at 100yds. to find the best.

If you are diligent, be consistent in your testing methods, and try to remove as many "variables" as possible during your testing, you will have an excellent chance of finding a brand or type of rimfire ammo that will give you excellent accuracy in your particular pistol. You might just find that you don't have to spend \$15 to \$20 a box to get also! One last tip; once you've found the "perfect load" purchase as much of that one lot number that you can afford. Sometimes even the mid to high priced ammo will vary slightly from one lot to another. Also, when you restock, do a quick accuracy test to see if the new lot is still shooting as well as the last. If you have a year or two's worth stockpiled of the same lot number, you can shoot with confidence that your ammo won't be the reason if you miss a target.

## Speed Loading the Bikal 46M

by Michael L. Hauschild

I am "The New Silhouetter" when it comes to the IHMSA game and it certainly has been a learning experience. I unpacked my old NRA Hunter Pistol equipment and went to the Nebraska State matches at Holdridge this year. I shot ammo loaded in 1991, trusted the scope setting still on the old ten inch contenders, and actually managed to hit some of the targets. I must admit not setting targets in the IHMSA matches is much more fun than not setting targets in the NRA matches. The NRA unset targets are simply the ones you missed and you had to walk down there anyway, the IHMSA range all the targets were set automatically. My heartfelt thanks to the match directors and the staff of the Holdridge range for all the hard work building the range apparatus and setting up the very well attended event.

Usually winter is a down time for competition here in the northern climates but one Michael Kunkee of the Isaac Walton League in Lincoln sets up the organizations clubhouse for the Air gun Silhouette Matches once a month. Same venue, auto set targets, illuminated backstops, and a five hour window to shoot your matches. I had always wanted to own one of the Bikal MP-46P Free Pistols and Mike's matches provided the perfect format to own this fine piece and keep myself in marksmanship trim. The price and accuracy of these instruments is amazing but as with all single shots there is one drawback; getting the pistol loaded for five firing sequences in the time allotted is very difficult.

I have substantial hands, and an arthritic thumb. On many occasions my last shots are rushed or never get sent downrange due to the time restraint caused by fumbling the loading sequence, picking up the dropped pellet, examining which end of the pellet to put in first, and once more picking up the dropped pellet, etcetera. I am sure that someone makes some sort of device to load these pistols rapidly but I have done some rudimentary searching and nothing seems to fit the bill.

With the month between these matches and my current retired status I spent some time experimenting and wish to share with you the possible solution to the time constraints inherent to loading the Bikal 46 while shooting the unlimited standing matches.

The pressure transfer gate opens to accept the pellet and leaves a space between the breach and the frame of one inch. (That is 2.54 centimeters for you, comrade.) The longest pellet I have found in my arsenal is the Daisy Pointed Field at .221" so that leaves me about three quarters of an inch thickness to manufacture something to "hold" the pellet for loading.

Everything about a pellet, the skirt, the nose, the integrity of the bore riding surface and the diameter is critical to getting it to strike the point of aim consistently; that list deletes almost any part of the pellet you can "grab" or "hold" without disfiguring the soft lead and altering the flight characteristics. The hollow cavity does provide the solution. A short peg of small diameter protruding through and perpendicular to a flat surface will "hold" the pellet for insertion freely into the breach. A small nail driven through a quarter inch board, filled to a length to match the depth of the pellet cavity worked perfectly for my "prototype." For reasons that will become evident in the illustration the "peg" must be no more than .200" from the edge of the flat surface and if you use multiple pegs they can be no closer together than half an inch.

The list of materials to build this device is less than five dollars and while some fairly critical dimensions exist they can be obtained by filing, grinding or considering expense, starting over. The materials list includes.

Base material 1/4" to 3/8" thick. I tried oak, cattle floor rubber mat, and a piece of 3/8" key stock.

"Peg" materials, small finish nails, and spare de-capping pins (cut in half with a Dremmel tool cutting wheel) from my reloading dies.

Extended nut, bolt, and a regular nut.

The pegs (nails) can be ground or filled to length after driven through the pre-

drilled and located positions in the base, the de-capping pins were simply JB Welded into the drilled holes and the selected pellet was used to push the pin in till the skirt contacted the key stock base.

Loading procedure;

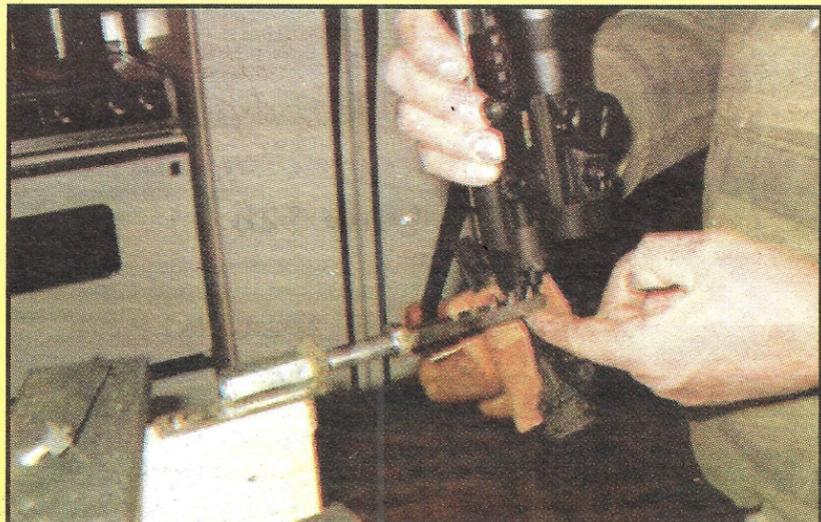

During the ready, place five pellets onto the pegs.

Cycle the pump arm of the 46M to open the loading gate.

Tip the pistol vertically and maneuver the breach over the peg-retained pellet.

Feel the pellet into the breach and use the action of lowering the pistol to insert it completely into the chamber. Note: it helps to place your index finger on the back side of the base material as a tactile index and support.

Lift the pistol free, close the loading gate, and initiate your firing sequence; repeat.

Since I have built and used this apparatus my practice scores have gone up, not because it improved my marksmanship, but I no longer drop shots due to the cease fire command. One other benefit to the multiple peg configurations is if you are practicing without a spotter you always can glance at the device and see which target you should be engaging.

Continued From Page 11

to write any more match reports or eat any more Sloppy Joe's for lunch, but on the other hand, I won't get to see a lot of my silhouette friends until next season. Thanks to everyone who helped out this year by coming to the match early to set up and staying late to put things away. Unless you're a match director, you can't imagine how much this is appreciated. Have a short safe Winter, and we'll see you in the Spring.

**ONTARIO**

**CAMBRIDGE, ONTARIO, CANADA  
Galt Sportsmen's Club  
November 21, 2010  
by Pete Durrant**

Good weather for the first of our winter series of Field Pistol matches, just a nice stiff breeze to make things more interesting.

We welcomed new IHMSA shooter Julian Wood to the match, not often we get a new IHMSA member these days so we were pleased about that. Julian is going to get his son to come and shoot Small Bore with us in the summer so that is another bonus, thanks Julian.

Best performance of the day came from Gerald Catt who shot well into the 60 Club with a fine aggregate of 67, nice shooting Gerald.

**Field Pistol Results:**

**December 5, 2010**

Cold for our second match in the winter series. A steady breeze in the cold resulted in lots of numb fingers and generally not too wonderful scores! However there was no snow which was a bonus.

Best score of the match again came from Gerald Catt who shot a fine 31 with his open sight gun, beat all the scoped scores, nice shooting Gerald.

**Field Pistol Results:**

P-INT	Gerald Catt	TC22HORN	31
P-AAA	Harry Niemi	TC434MAG	19

**KANSAS**

**LINWOOD, KANSAS  
Tri County Rod and Gun Club  
October 10, 2010  
by Bob Curry**

"Plenty of time, plenty of time." - Rex Widmer

Once again the Kansas and Missouri silhouette shooters gathered at Tri County Rod and Gun Club to compete for the Coveted Rex Cup. The Cup is named after the late Rex Widmer, whose

exploits and expoundings on the firing line have achieved the status of legend. The reverse side of the cup displays a tee shirt pocket in commemoration of the day at the 1989 Internationals when Rex appeared on the firing line wearing a unique tee shirt having the pocket on the back. The obverse side of the cup is unadorned because it - like many trophy cups - is round, and as everyone who has shot with Rex knows, the rule is "Pointy end first."

In order to acquire Cup points, a shooter must win events in which at least one shooter from the other state competes. The Cup winner is the one who amasses the most Cup points. There were four points awarded this year, and each is denoted below with an asterisk. In the event that no competitor emerges with a majority of the points, the Cup is awarded by the match director on the basis of Perceived Merit. The only limitation on this is that the match director cannot win it himself without satisfying a series of rather complicated requirements involving the transfer of funds which do not concern us here.

The 2010 Rex Cup was awarded to Jeff Hegwald of Kansas for the extremely meritorious reasons that he shot a Half-Scale 40x40 using cast bullets, and then won a shoot-off at 200m on Small Bore chickens. When asked by this reporter what type of cast bullet he used, Jeff launched into a diatribe about the price of gas checks that is not germane to this report.

Once again I would like to thank all of you enthusiastic and unselfish members without whose unstinting assistance another successful season would not have happened. Let's shoot steel next March!

**WICHITA, KANSAS  
YHSI**

**August 29, 2010  
by Mark Barb**

This is the match report I have not been looking forward to writing. We have been averaging less than 5 guns a match.

We did not have enough to hold the last two matches. Young Hunters Safety has decided not to continue matches. I have been involved as a match director for about 14 years. I shot at YHSI for about three years before that. This is a bitter-sweet time for me. I do intend on shooting more next year and hope to get to the internationals in the next couple of years.

I appreciate the support of the shooters over the years. Carl Conley was a rock in getting me started and keeping me going. Les Sawyer got the ball rolling to begin with and still dropped by to visit.

Thank you for the many years of good times.

by Chris Dunlap**

We had a very good weekend for our last match of the year.

Junior Audrey Snodgrass got her first leg into UAS-AAA with a fine 38. Bob and Margaret Curry were both practicing for deer season by tying with 30 using a CZ rifle. They then shot Fifth-Scale also.

David Glass set a new range record of 35 in Field Pistol Production. Michele Dunlap won Field Pistol PAS with her Hornet. That was her first gun since 2008.

Congratulations to all with these fine scores. Everyone have a safe winter. We will start shooting next year in March.

**NOTE TO SHOOTERS:** We plan to start shooting the 5th Sunday of the month, beginning January 30, 2011.

**FRIENDSWOOD, TEXAS  
PSC Shooting Club  
September 18, 2010  
by Randy Parker**

No laying down on the job today, or on the range! Well almost, folks did shoot creedmore in Half-Scale and Fifth-Scale. There was only one 40, and that was Gary Bridges in Big Bore Unlimited Any Sights Half-Scale. Roseanne Willis, who has only been shooting a little over two years, took both of her Field Pistol matches with an excellent 27 in Production Any Sights. Dennis Proffitt, another new shooter in his third year, won all three lever action matches.

What caused everyone's jaw to drip was Gary Bridges shooting his high dollar Texas manufactured concealed carry gun in our "Bordello" match. He scores a 25 with his semi-auto, STI Apeiro, 40 S&W. Don't mess with Texas... or Gary. Our "Bordello" match is fun and the rules are pretty simple. There ain't no rules! Almost no rules, your weapon must be "concealable" and use IHMSA Field Pistol authorized pistol caliber cartridges. During a normal five shot string, the shooter may only reload his weapon one time. That would mean a single shot weapon would be limited to only two shots, and all weapons would be limited to five shots. You shoot a normal IHMSA Field Pistol course of fire, but there are no skill classifications for "Bordello". You gets your gun and shoots it!

**October 16, 2010**

Beautiful days have arrived in Houston. October and March can be our best months with several low humidity, clear skies, and temperatures in the 80's. It's great!

Predominance of Standing and rifle shooters were at this match. Don't know why, but Standing shooting has been popular for the last two matches. Most of the time, you can't find one. Now we got'em. Well not 40's today, but Jimmy Willis left one ram scoring a 39 in Big Bore Unlimited Any Sights. Jimmy's wife, Roseanne, was not to be outdone. She scored a 30 while winning her Field Pistol, Production Any Sights match. Gary Bridges managed an enviable 36 while shooting Small Bore Fifth-Scale at these near invisible critters. Dennis Proffitt repeated his victory of all three lever action matches.

**November 20, 2010**

Ain't it great when you have a beautiful match day? We had one with clear bright skies, a slight breeze and 80 degree temperatures. You could even see the Fifth-Scale animals. (Pretty well). Competitors seemed to have a smile, high expectations, and with hopes for high scores. Everyone lent a hand to set-up and then pick-up the range after the match. It was just a great day!

In spite of the beautiful day, there were no 40's scored. There were some good scores, and as happens, some disappointments. John McVeigh had made steady improvement, and shot some of his best scores of the year with his FA 44 Mag. Jimmy Willis shot a 37 (dang turkeys) with his 7BR Wichita. I suspect Jimmy will have a 40 with that Wichita in the next few matches. Jimmy also shot a 35 with his FA 44 Mag. Not bad! Gary Bridges is still looking for a Fifth-Scale 40, but his missing a chicken sort of took the air out of his tires. He managed a 33, not his best, but not shabby either. Dang...

... those things are small!!! You can put two of 'em on your front sight. Roseanne Willis shot a 29 in her Field Pistol PAS match. All went well for this AAA shooter except for the second bank of chickens who didn't even get their feathers ruffled. Oh well... Our Shooting Star for the day was Dennis Proffitt who won both his Cowboy Lever Action matches and shot two Grand Slams. One Pigs Grand Slam with his Marlin 336 30/30, and one Turkey Grand Slam with is 22 LR Marlin 39A. Although Dennis is a new shooter, I hope we can send him to Raton next year for NRA Cowboy Rifle Silhouette Championships.

start the day! In UAS we had 4 entries, all shot 40x40. The shoot-off targets were turkey heads at an unknown distance, something between the turkey distance and the ram distance. Todd took first with 7 of the 10 turkey heads, and Steve was second with 6 targets.

November 20, 2010

Richard Erickson stopped in to check out the AIR gun competition. He got a 747 the day before the match and wasn't ready to shoot it. But he did try out Todd's Standing gun, and we hope to see Richard all sighted in and ready to shoot at the next match.

Mike Dougherty shot an International level score of 38 in Production and jumped class from AA right into AAA. Ken LaCroix shot Production for the first time with is new 747. Using factory sights and getting sight settings he shot a 36 and is in AAA Production.

There were lots of shoot-offs. Steve took the Unlimited shoot-off with 5 targets to Dan's 3. In UAS the targets were turkey heads at the turkey distance. Rick started the shoot-off, but using open sights he didn't get any. Todd was up next and took 4 of 5. Ken took UAS with 5 of 5 targets. In Half-Scale Todd and Ken also both had 40x40. The targets this time were Half-Scale turkey heads (that's about the size of a grain of rice), Todd started the shoot-off and got 2 targets. Ken finished the shoot-off with 4 of 5 targets. That's good shooting!

Even with a 6 inch plus snow fall overnight we had a good turnout. Richard Erickson came back with his Daisy 747 and shot his first ever AIR gun entry. While getting sight settings he shot a Standing 15. That is a very solid start. There were 3 shoot-offs. Steve was in all 3 and Ken and Todd were in 2 of 3. Steve won Unlimited and UAS, and Todd won UAS Half-Scale.

December 18, 2010

For the last match in 2010 it was cool but no snow, so the drive to the match was easy. The previous two matches we had snow and very tough driving to the matches. So, this was a treat.

Mike Dougherty is building a new UAS gun, so he shot 2 entries in UAS. The first was with his old gun and put up a 37 for a leg into AAA. Then he borrowed Todd's IZH 46M, which is similar to what his new gun will be, and shot a 38 for his second leg into UAS-AAA.

We had 2 shoot-offs at this match. The first was in UAS. Steve won that one with 3 to Todd's 2 turkey heads. Four people shot 40x40 in Unlimited. Rick left early so he missed the fun. Steve, Todd and Dan took turns shooting. The targets were Half-Scale turkeys at the ram line.

Each shooter had a string of 5 targets. It took 3 relays to decide the winner. It was Steve winning with 13, then Dan with 12 and Todd with 6 targets.

ST. FRANCIS, MINNESOTA Minnetonka Game and Fish Club October 10, 2010 by Ken LaCroix

This was the last match of the year; hope everyone had fun this year. It might be the last match on the old range, it sounds like we will be doing the dirt work this fall or early spring and then we will have Big Bore.

Looks like everyone had fun with the Bor-dello match that we had as we had 12 entries.

See you all at the AIR Pistol matches this winter.

A big thank you to all that helped paint and tear down the range at the end.

Not a lot of Sin City Silhouette shooters showed up this month. Al got his UAS 40 as usual and Debi Wright shot a nice UAS 32. Scared Dan enough to just shoot US. To be fair he was going to shoot UAS but pinched his trigger finger in his tripod and got a big, nasty blood blister. Accident? Shoot well, take care.

Big Bore Results: S-B Bob Purdue RUG44 3 UAS-INT Alan Coffin TCOTT25 PPC 40 UAS-AAA Debi Wright XP7BR 32 US-A Don Wright RPM357 7

October 24, 2010

The Sin City Silhouette shooters must be getting older, or going blind anyway. There were only 3 Standing shooters this month and I was the only free style open sight shooter. What's happened to all the Unlimited guns.

Joe Kennedy had his car stolen along with a few guns and his shooting glasses and sight settings. He got the car back but not his shooting essentials, so I managed to actually out shoot him this month.

Pete Hofmann came out with is reliable Standing gun with a scope on it. He shot a 35 in UAS and confidently said he'll shoot a 40 next month. Shoot two Pete, then find out what it's like to shoot-off vs. "Mr. Automatic", Alan Coffin. Good luck with that.

No I didn't steal Joe's car really! Al is back to shooting 40's by the way. I think he saw Pete over his shoulder.

Debi Wright isn't just kicking Dan's butt, she's been bringing her scores up of late. I wonder how she'd do if she practiced a little. I know, grandkids and a new puppy can keep you busy.

Shoot well, take care. P.S. For the last time - I had nothing to do with Joe's car!

Kingman Breezes all over town kept the Sin City Silhouette Shooters home today. Oddly enough, however, they didn't blow at the range. A little cold by our standards but nothing we couldn't handle.

Bob Purdue came out with a new scoped rig but had some problems. Pete Hofmann did also. After promising me a 40 in UAS this month he decided that maybe a little practice is in order, Gee, ya think?

Shoot well, take care. Fifth-Scale Results: UAS-INT Paul Habig ANS 40 Small Bore Results: P-INT Paul Habig BF 39 R-INT Paul Habig FA 40 S-INT Paul Habig BF 25 U-INT Paul Habig ANS 40 UAS-AA Peter Hofmann HS 34 US-B Bob Purdue TC 4

We had an excellent turnout today with a total of 15 entries.

I always enjoy it when a AAA shooter outguns the International shooters, and that is just what happened today in UAS. Oliver Gudmundson shot a 39 taking the UAS championship from Ron Silveira by one target. Great job Oliver!

The same thing happened in US with Ron Silveira firing a 29 to beat yours truly in AAA class. Congratulations Ron!

Tom Santos was the clear cut champion in USIS with a 22.

Steve Ware took the Unlimited and High Senior titles.

Thanks to Paul, Ron, Mike, Tom, and Oliver for setting up and tearing down the range. We could not run these matches so smoothly without many hands.

Fourteen entries for our monthly Tommy Gun match was very respectable. While some of the scores were not as high as we may have liked, everyone had fun and we even had a shoot-off in US! Tom Santos and Steve Ware were tied at 23 for match champion. Shoot-off targets were pigs at the ram line. It was rather an exciting one as it took a total of 4 relays of 5 shots each to finally break the tie with Steve taking the win 9x20 targets to Tom's 6x20. Steve was also the Unlimited champion with Paul Hoadley one target behind.

Mike Hopkins was our UAS champion and High Senior. It seemed like everyone that shot UAS struggled along the way.

Oliver Gudmundson was our USIS champion.

Thanks to Paul, Ron, Oliver, and Tom for helping to set up and tear down the range.

**November 14, 2010**

It was a heck of a match with several twists and turns before everything was sorted out and the winners declared. Rick Redd joined us for the first time and walked away a big winner. While no stranger to shooting steel, he is a new IHMSA member and ended up on the top of the heap several times. His first entry into Field Pistol Production garnered him an International classification and match champion. He then ended up in a tie with Paul Hoadley for match champion in Small Bore Unlimited Standing. Fifth-Scale chickens at 25 yards were used as the tie breakers, and Rick whacked 5 to Paul's 3 giving him that win.

Mike Abel was our Field Pistol Production Any Sight champion with Ron Sprafkin right behind him missing the mark by only 1 target. But, Ron did take the Small Bore Standing title. Mike tied with Dave Healy in Small Bore Unlimited Any Sight both having fired 40's. They each hit 1x5 shoot-off targets then decided to break the tie with a coin toss. Mike came up the victor. However, Dave fired his first Small Bore 40 and came out with a AAA classification with a leg into International class. All in all, it wasn't a bad day for him!

Dave Whitman was our match champion in Unlimited One-Fifth Scale. There was a three way tie in Big Bore Unlimited Half-Scale with Mike Abel, Dave Whitman, and Kevin Baker all having shot 40's. In the end, Kevin was our match champion with 3x5 shoot-off targets. The win also gave him his final leg into International class. While Dave did not end up the winner he was our High Senior.

Rich Burket brought his Winchester 30-30 out and fired a round on the Field Pistol targets. He ended up with a very nice 32.

Over on the Small Bore side, Don Ritz was our Production champion. He and Charlie Dean tied for match champion in Revolver class and they decided to let reverse animal count declare

the winner, which was Charlie. Don was also our Unlimited champion. Oliver Gudmundson fired his first Small Bore entry and is now a C class Unlimited shooter.

Thanks to Charlie, Mike, Don, Paul, and Kevin for helping to set up and tear down the range and to Fay for running the match!

**November 21, 2010**

Our north facing range and the low winter sun combined to wash out the pig and turkey line offering many challenges to our iron sight shooters, and some of the scores reflected that challenge! However, others managed to rise to the occasion and shoot some excellent scores. Mike Abel introduced his friend Cody to our game, and he fired an outstanding 37 in Unlimited Any Sight. Had he joined IHMSA he would have been the match champion.

Joe Cullison has a darned good day firing a Production 40 and a Standing 34 to take both those titles. He also fired another entry into the President's 100 Club with a 3 Gun Aggregate of 109.

Dave Whitman was our Revolver champion, and Charlie Dean took the Unlimited title. Charlie and Mike Abel were tied at 40 and 5 shoot-off targets after two rounds of shoot-offs. They decided to determine the winner by a coin toss, and Charlie won. Paul Hoadley was our Unlimited Standing champion.

Our good friend Rich Burket brought his Winchester model 94 and a box of cast bullets to give the Big Bore targets a whack. He ended up with a very good 27. Now that he's gotten some Kentucky windage settings he should do better next time.

The Half-Scale shooters had a time of it. We had a 3 way tie between Charlie Dean, Mike Abel, and Dave Whitman. Charlie took to the shoot-off targets first and shot a 4x5 expending the last of his ammunition. Mike and Dave also fired 4x5. Charlie was in third place due to lack of ammunition, and Mike and Dave continued on. After 2 more rounds, they remained tied at 12x15. Mike was determined to not go the coin toss route this time; so, they went to the line for a fourth time. Mike fired a 5x5, and Dave fired a 4x5 giving Mike the hard fought win.

Several of us were considering firing Half-Scale, but the poor lighting scared us off. Charlie was the only stouthearted soul willing to brave the little animals with iron sights and took that title.

Thanks to Joe, Dave, Levi, Paul, Mike, Charlie, and Oliver for helping to set up and tear down the range and to Ron for helping to get the office set up. Don and Fay we missed you!

**November 27, 2010**

Thanks to Paul, Dave, Ron and Ron for running the match while Irene and I celebrated Thanksgiving on the beautiful Oregon coast.

Ron Sprafkin certainly had a great day. He won the UAS and US match championships, fired a leg into AAA in US, and earned a ten in a row pin for 10 rams in US. Ron reported in an email to me that Paul, Dave and Ron Silveira all had weird things happen for which to blame their low scores. We'll just leave it at that I believe.

Dave Healy fired his first entry in the unsanctioned Twentieth-Scale and hit 22 of the pesky little critters.

**December 1, 2010**

Our mid week Tommy Gun match ended up with a rather large turnout! Steve Ware took the Unlimited and Unlimited Any Sight titles, but the UAS went down to a shoot off. Steve and Paul were tied with 40. The shoot off targets were Twentieth-Scale pigs at the ram line. Steve hit the first 3 then missed the last two. Paul came up one target short for a tie to put things into another round.

Ron Silveira was the Unlimited Standing champion and certainly did not have to worry too much about a challenge from any other shooter. The same held true for Tom Santos as he was the clear winner in Unlimited Standing Iron Sight.

Thanks to Paul, Oliver, Mike, Tom, Ron and Chris for helping to set up and tear down the range.

**December 12, 2010**

We had several visitors today that tried their hand at our game. Scot and Michele Shearer (incoming JCSA president and secretary respectively) brought their Action Pistol handguns and shot a few rounds on the Field Pistol course. They both had fun and promised to be back next month. We hope so. Tyler Able also stopped by and shot through the Half-Scale course. While he has been out of town in school and unable to compete for quite some time it is obvious by his score that he hasn't lost his touch.

Kevin Baker was our Field Pistol Production champion for the day while Dave Whitman's entry took the unofficial Standard Handgun honors. Dave is our 2010 Standard Handgun champion having shot 2 scores of 27. Looking back at the records every one of Dave's Standard Handgun scores this year except one have been 20 or better. This certainly proves that you don't need a whiz bang super gun to compete and have fun in this sport. Paul Hoadley was our Field Pistol Production Any Sight champion, but it was a close race with Charlie Dean right on his heels.

Dave Whitman did very well in the Fifth-Scale and Half-Scale events taking both those titles. He was tied with Mike Abel in Half-Scale both having shot 40. Dave hit 2x5 shoot off targets to Mike's 1 taking the title.

Rich Burket joined us and shot a very nice 30 in Small Bore Rifle with his Winchester 69.

No one really dominated the Small Bore competition. Don Ritz was our Production winner. Charlie Dean did take two titles, Revolver and Unlimited Any Sight. Larry Hixson was our Unlimited winner by reverse animal count. Larry, Charlie and Don all fired 36's but no one shot off the tie; so, reverse animal count determined the winner. Ron Sprafkin was our Unlimited Standing champion.

Thanks to Don, Mike, Charlie, Tyler, Kevin, and Paul for helping to run the match and setting up and tearing down the range. Fay we missed you!

**December 19, 2010**

I rarely mention the weather because who really cares what the weather was in SW Oregon two months after the match was fired? But, today is an exception. It was chilly (for us) with a high of 35, we had intermittent snow and rain, and it was dark and cloudy. That accounts for some rather low scores and makes those exceptional scores even more exceptional!

First, thanks to everyone that helped set up and tear down the range (Don, Charlie, Mike, and anyone else that helped after I left), run the match (Fay), and cook lunch (Paul). I was unable to stay due to a recent surgery. And, now on to the highlights!

Don Ritz was our Production champion with a 37 in inclement conditions with his "roll your own" cast bullets.

Dave Whitman fired a perfect Revolver 40 which is an accomplishment even on a good day. That also earned him High Senior.

Mike Abel took the Unlimited title with a perfect 40. Charlie Dean and Don Ritz were right on his heels, but fell a few targets short.

**2011 OREGON STATE AIR PISTOL CHAMPIONSHIP**

**JOSEPHINE COUNTY SPORTSMAN ASSOCIATION**  
**GRANTS PASS, OREGON**

**AFTERNOON OF MARCH 25, 2011**  
**MARCH 26, 2011**

We are shooting a 60 round match open to all NRA/IHMSA shooters. This is an open championship and all IHMSA/NRA shooters qualify for championship trophies.

Entry Fee: \$10/gun - Juniors maximum of \$15 regardless of number of guns.

Sighters begin at 12:30 PM on March 25 with the match starting at 1:00 PM.  
 Sighters begin at 9:00 AM on March 26 with the match starting at 9:30 AM.

**Note: Lunch on March 26 is included in your entry fee.**

We will also be offering match t-shirts for sale.

Contact Steve Ware for details.  
 541-660-8852 or [steve@sworegon.com](mailto:steve@sworegon.com)

Leo Aregian was our Standing champion while Larry Hixson took the Unlimited Standing title.

Oliver Gudmundson fired his first entry in Unlimited and is now classified. Oliver is now shooting AIR, Small Bore and Big Bore.

Rich Burket brought his Winchester Model 94 back and fired a nice 28 with cast bullets bettering his score from last month by one target.

Kevin Baker was our Unlimited Any Sight Half-Scale champion with an outstanding 40+5 shoot-off targets to Mike Abel's 40+2.

Thanks to all our travelers, Don and Fay, Larry, Dave, and Leo. I hope you all made it home safely.

The January Tommy Gun match was also the kick off to the 2011 pistol silhouette season for the JCSA Pistol Silhouette Club. Unfortunately, I was unable to attend due to family matters, and I greatly appreciate Paul Hoadley stepping in to run the match. Also, thanks to everyone that pitched in to help Paul set up and tear down the range.

No question that Ron Silveira was the top dog of the match winning both the Unlimited Any Sight and the Unlimited Standing championships. He was also High Senior.

However, Ron was not unchallenged. Tom Santos tied him in Unlimited Any Sight leading to a shoot-off where Ron hit 4x5 to Tom's 2x5. Tom was our Unlimited Standing Iron Sight champion.

Our newest shooter, Oliver Gudmundson, continues to improve his scores, and I believe he will be giving some of our older shooters a run for their money soon. Oliver is also branching out into Small Bore and Big Bore.

**WASHINGTON**

**PUYALLUP, WASHINGTON  
Paul Bunyan Rifle Club  
November 6, 2010  
by Bret Stuntebeck**

We had 6 shooters this month putting 16 guns across the line. Weather forecast was for rain. It was raining lightly when I got to the range but soon stopped and we had no rain until about the last half hour of the match. Guess we really lucked out this month. We had a long distance traveler shooting with us this month. Nobody new. Steve Parsons who recently move to South Carolina was out for the week on business came out with a few guns and shot.

Hopefully this will be a regular thing and he can plan his trips around our matches. Steve Bishop made the trek over from Yakima as the passes were clear. Lets hope they stay that way for the coming months. Well, on to the results of the match. Vincent Leete posted a very nice

**Match Publication Policy**

As we continually have new match directors, following is the IHMSA News' policy on publication of state, regional, and "specialty" match notices and match results.

Any IHMSA sanctioned club in good standing may publish a notice of their club's state or regional championship match at no charge for three months. State match notices are limited to 2 1/4 "x5". Regional match notices are limited to 4 3/4"x5". If a club is holding a "specialty" match and that match does not replace one of these championships, the IHMSA News will publish a 2 1/4"x5" notice at no charge one time. These notices will run in Section B only. The club may publish additional notices of the same size for \$45 per issue. Ads must be prepaid before printing. All payments are to be sent to IHMSA HQ, P.O. Box 94690, South Jordan, UT. 84095 The club may specify whether the paid notice is published in Section A or B.

State match results can list both first and second place finishes. Regional match results can list first, second, and third place finishes. "Specialty" matches replacing a state championship may publish first and second place finishes. "Specialty" matches replacing a regional championship may publish first, second, and third place finishes. All other match results wherein the total number of handgun silhouette entries exceeds 11 (including all IHMSA, NRA & non-member guests) can list only the first place finish. Matches with less than 11 total handgun entries as defined above can list all IHMSA handgun entrants and their place. Regardless of the above, all 40's, 60's, and 80's (depending on the number of rounds fired at the match) can be published from ANY IHMSA match.

An IHMSA club holding a dual sanctioned (IHMSA/NRA) match may submit a match report for publication in the IHMSA News containing both IHMSA and NRA results. The number of published NRA results may not exceed the number of published IHMSA results. Publication is limited to IHMSA sanctioned handgun disciplines only.

Please address any questions concerning this policy to your Regional Director.

U-AAA 39, then followed shooting his very first UHS entry with a newly aquired XP-100 in 6.5TCU. Looks like the gun shoots pretty well with Vince posting a solid 28. Not too bad for a first entry.

Steve Bishop posted a U-AAA 31 followed by a R-AAA 29, Doug Forsyth posted a U-INT 38 letting one turkey and one ram get away. On the Small Bore side of things Joe Stumpf posted a nice UAS-AA 36 shooting his Browning Buckmark. Steve Parsons shot three entries using his FA Revolver posting a R-AAA 30, P-AAA 29, and U-AA 26. I ended up with a U-INT 39 so Vince and I shot off for match winner. We shot Half-Scale turkeys at 150 and I ended up winning 4 to 0.

As usual our target setters did a fantastic job.

Until next time shoot straight and be safe.

**December 4, 2010**

We had 5 shooters show up in the bitter cold this month putting 15 guns across the line. Weather forecast was of clear skies but you know what that means this time of year..... CCCCCCCCCC! It was about 25 degrees when I got to the range. It did manage to warm up by the afternoon to the high 30's. The winds were calm and it was a great day to hold a match. Those of you that were not able to attend missed a good one. NO RAIN. We had a new shooter this month. Brian MacConaghy came down to shoot with us. He is not new to Silhouette but said he hasn't shot since the late 90's. We hope he becomes a regular.

Well, on to the results of the match. In the Unlimited category we had some historic events. We added two new members to the Last Ram Club. Yes two. Doug Forsyth was the first posting a U-INT 39 missing the Last Ram. Vince Leete was the second posting a U-AAA 39, again missing the Last Ram. I personally have been a member of this club for some time so welcome aboard guys. As a mater of fact I also missed a ram this match, it just wasn't the

LAST RAM. Another key note on this is that this would have been Vince's first 40 if he wouldn't have missed the LAST RAM!! Ok all kidding aside, still some nice shooting for this frigid day. Joe Stumpf posted a U-AAA 31 with a new to him XP-100, 7BR. Joe recently received the gun and it came with some loaded ammo and sight settings. He had only shot the gun a few times to see if the sight settings were in the ballpark. They seemed close so he gave it a whirl.

With a little load development of his own and a few more range settings I am sure those scores will be coming up.

Doug Forsyth posted a P-AAA 29. Joe Stumpf posted a P-AA 29 as well as a R-AA 31, nice shooting. Our new shooter Brian MacConaghy posted a very nice US score of 34 starting him out in AAA. Great shooting Brian. I did manage to eek out a 100 Club entry with a U-39, P-35 and S-26.

On the Small Bore side Vince Leete posted a respectable U-AAA 37 and Joe Stumpf posted a UAS AAA 34.

All in all the shooting was a great match. Even with the cold weather and light conditions fading by early afternoon we all had a blast. Our new target setters Jesse and Jake are doing a great job.

Until next time shoot straight and be safe.

**GRAND JUNCTION, COLORADO  
Grand Junction Target Shooters  
AIR PISTOL STATE CHAMPIONSHIP  
December 5, 2010  
by Ed Buniger**

December 5, 2010 was the day to try and win first place in our AIR Pistol Championship.

Mike Browning did a very good job by winning three of the four classes that were shot. Good job, Mike. Doug Noble and I had to shoot-off for the lower place trophies in the Unlimited class, with Doug hitting 3 out of 5 chickens on the ram line to my 2 targets.

We got to run our outdoor match in December as well, with 5 shooters showing up, on one of the best days of the year to shoot. No wind, 45° temperature and sun shining.

Hope to see everybody next year.

**SOUTH DAKOTA**

**PRINGLE, SOUTH DAKOTA  
Southern Hills Silhouette Club  
October 9, 2010  
by Dick Pattison**

The October match had some typical fall weather. We had rain, sun, wind and it was COLD. I forgot to bring my carhart Saturday, you can bet it was the first thing I put in my pickup Sunday morning.

Vicki was the match director this month and she did a fine job. I will take the loicle Idiot match for 2011, we will draw for match directors for the matches in 2011.

We had a total of 48 entries counting the Cowboy and Bordello entries, with 36 of those as IHMSA entries. Dave Smith of Cheyenne, Wyoming shot a 40 with 9 shoot-off targets in Big Bore UAS. That's a hard score to beat or match. I guess shooting the chickens shoot-off targets in Cheyenne pays off.

**AUSTRALIA  
2010 IHMSA/SSAA  
NATIONAL CHAMPIONSHIPS  
CANBERRA, AUSTRALIA  
SSPC-ACT Club  
October 2 - October 8, 2010**

Joseph and Dave Larvin scored 2 each. On the third run through Noel had 4, Joseph had 4 and Dave had 1, so Dave dropped off the bottom. The marathon then began. It took another 3 runs before Noel came out the victor for third place in UAS.

Once again, here is the variety of firearms used in the 8 Big Bore categories. Production -9xTC7TCU, 5xMOA7BR, 3xTC300W, 2xBF7US, 2xTCG2 357, 2xTC357, 1xBF300W, 1xBF30MAX, 1xXL7TCU, 1xTC30HER, 1xTCEN7BR, 1xFa357, 1xICH7REM. Revolver - 20xFa357, 4xS&W357, 1xFa41MAG, 1xRUG44MAG, 1xS&W44MAG, 1xDW357SM, Standing - 15xTC300W, 4xTC32.20, 2xTC357, 2xTCG2:300W, 1xTCG2:357, 1xTCEN7BR, 1xTC7TCU, 1xBF300W, 1xRUG44MAG, 1xS&W44MAG, 1xXL7TCU, 1xWICH7REM.

Unlimited - 16xXP7BR, 2xXP7-08, 2xXP7T-CU, 1xXP30BR, 1xXP300SAV, 1xXP7INT, 1xHS7BR, 1xHS308, 1xMAB7BR, 1xTIK7TCU, 1xTCG2:7x30W.

Unlimited Standing - 6xTC300W, 1xTC30.30, 1xTCG2:30.30, 1xTCG2:300W, 1xTC30HER, 1xTC7TCU, 1xXP7BR, 1xMOA7TCU.

Unlimited Any Sight - 10xXP7BR, 2xXP7-08, 1xWICH7IHMSA, 1xTC30HER, 1xTC&TCU, 1xTCG2:7x30W., 1xBF30MAC, 1xCZ7.62x39IMP.

Unlimited Half-Scale - 9xXP7BR, 2xXP7.08, 1xHS7BR, 1xHS308, 1xXP300SAV, 1xXP6BR, 1xXP7TCU, 1xTCG2:7x30W, 1xCZ7.62x39IMP, 1xTIK222, 1xTCG2:223.

Unlimited Any Sight Half Scale - 7xXP7BR, 2xTC223, 1xXP22BR, 1xWICH6BR, 1xXP223, 1xTCG2:223, 1xTC30HER.

The Big Bore Presentation was held at the Kaleen Sports Club where we all had an excellent meal. The Open Big Bore Four Match Aggregate went to Wayne Christian with a 144 and the Ladies to Judy Harding with a 140. The 10 Match Aggregate was won by Wayne Christian on 348 followed by Bruce Dunbar and John Harding. National Champions were: Production, Kim Emery 40. Revolver, Wayne Christian 38, Standing, Keith Rigby 29, Unlimited, Kim Emery 40, Unlimited Standing, Kim Emery 30, Unlimited Any Sight, David Robinson 40, Unlimited Half Scale, Lou Forner 38 and Unlimited Any Sights Half Scale, Dominic Piscioneri, 39. It was interesting to note that the domination of the Unlimited Scoped Matches by the South Australians was surpassed this year by the West Aussies. The competition was very fierce in these matches.

After all medals had been presented it was time for the Prize Draw. Thanks once again to Russell Mowles for his organising of all the products available for us to chose from - there was great variety. Some took a while to decide as it's not easy if you are flying - can't carry this, can't carry that, that's too heavy etc etc, but in the end everyone left with a smile on their face.

**Thanks:**  
A very sincere heartfelt thanks to Wayne Christian (organising both presentation dinners), Cheyne Fischer (Range preparation), Brian and Johanna Marsden (scoring for 6 days), Kerrie Ellem (helping in the scoring room), Russell Mowles (prize table), Greg Dawson, Neville Ellem, Geoff Edwards and any others who stood shoot off targets, Lou Forner (running the shoot offs), John Harding (making sure all the trophies arrived in one piece), and to all the competitors for making it such an enjoyable National Championships. If I have forgotten anyone, please forgive me, but thanks anyway.

**2010 NATIONAL CHAMPIONS:**

Open 100 m Agg	Matt Seears	NSW	146
Women's 100 m Agg	Melinda Mullen	NSW	133
Junior's 100 m Agg	Daniel Harding	WA	66
Open FP Agg	Bruce Dunbar	NSW	66
Women's FP Agg	Melinda Mullen	NSW	55

**U.S. RESIDENTS IHMSA MEMBERSHIP APPLICATION**

Basic IHMSA membership is \$35.00 per year. Included with your basic membership is a membership/classification card, air card insert if requested, a subscription to the IHMSA News, and a copy of the IHMSA rule book, and window sticker and target templates for new members. Existing members may purchase templates or stickers for a small additional fee. Family memberships, for your spouse or children under 18, are \$10.00 per person per year, and include only the IHMSA membership/classification card. First class postage of IHMSA News is an additional \$15.00. Membership kits will be mailed First Class. Please allow 2-3 weeks for processing.

**PLEASE PRINT CLEARLY**

**NON-U.S. RESIDENTS IHMSA MEMBERSHIP APPLICATION**

Basic IHMSA membership is \$35.00 (US) per year. Included with your basic membership is a membership/classification card, a subscription to the IHMSA News, a copy of the IHMSA rule book, and a set of target templates and window sticker to new members. For an additional fee these last two items are available for purchase in addition to your membership fees. Family memberships, for your spouse or children under 18, are \$10.00 per person per year and include only the IHMSA membership/classification card. Membership Kits will be mailed first class. Please allow 3-4 weeks for processing. All prices reflect a cash discount pricing. C.C.'s subject to additional fee. Postage rates for delivery of the IHMSA News outside the U.S. (except Canada and bulk delivery to the Brazilian and New Zealand Directors) are:

(Choose one) Air/First Class - \$55/yr.\* Surface Rates - \$18/yr.\*  
 Bulk delivery of the IHMSA News to Brazil - \$12/yr\*  
 (Choose one) Air/First Class for Canada - \$15/yr\* Standard Delivery - \$5/yr\*

Make all payments payable to: IHMSA, Inc. (Membership & postage) must be made in U.S. funds

Please print clearly, your delivery is depending on it!

If this is a renewal please fill in your IHMSA Number \_\_\_\_\_

# Wildcat Corner

By Tom Acheson

Most of us during the development of our match loads, have found ourselves needing to trim our cases to a specific length. Oddly, most brands of new cases are seldom the listed SAMMI length that we see in loading manuals. They are usually shorter. So the need to trim new cases might be limited unless you desire to have all cases the same length at the start of your loading session. In that case you'd be checking the pile of cases, find the shortest one and then trim the rest to that length.

For the BPCR (black powder cartridge rifle) shooter, there is a desire to have the case the maximum length that will allow a loaded round to be chambered. Black powder operates at lower pressures and it is really important to seal the chamber at the instant of ignition, so they want the end of the case mouth right up into the chamber to help develop the seal needed to produce uniform ignition for each round that is shot. So these guys like to get cases that are just a bit too long so they can custom trim the case to fit a specific rifle's chamber.

Then others (smokeless powder) have to trim their cases because they have grown in length due to repeated firing and stretching of the brass. Cases that are too long will not chamber safely or properly causing safety and performance concerns.

Just about every handloading products company makes some type of case trimmer. Let's take a look at two examples; the Forester and the L.E. Wilson trimmers. I own both so it's interesting to see how they differ.

The current trimming situation I have is the need to trim some 405 Winchester cases to be used in a BPCR that is chambered in .40-70 Sharps Straight. The nominal case length for the .49-70 is 2 1/2". The 405 Winchester is listed at 2.583" but the longest one in the (100) new cases that I have is 2.570". But that's OK. By trimming a case until it will just chamber, I'll be able to determine how long the whole batch should be trimmed to. There were two other options for a parent case for the .40-70; the 30-40 Krag case, which after being re-formed comes out to 2.490" and a brand called Bertram (made in Australia)

which I've not had any experience with.

The first trimmer I owned was the Forester unit. It was my father's and I acquired it after he passed on. The first thing I did was replace the cutter because he had used this thing a lot! But I found over the years that after setting it up and trimming a pile of .41 Mag cases (which are NEVER the SAMMI maximum 1.285" long out of the box), a post trimming spot check revealed variations in the length of the cases, despite having locked the settings quite tightly and trying to be consistent in the use of the tool.

Enter the L. E. Wilson unit. Someone suggested that I try it so I did. Here is where the two units differ. The Forester controls the length of the case after the cutter reaches its maximum extension during cutting and no longer removes material by using a set screw lock ring on the cutter shaft. The L. E. Wilson unit has an adjustable "tail stop" that is adjusted to determine the final length of the newly trimmed case. The cutter is fixed as to how far it extends during cutting for all trimming operations and case lengths so the user does not adjust this stop point. You can retract the cutter shaft to allow insertion of the case and then start the trimming process.

The Forester trimmer uses a small collection of collets and these are positioned in the "tail stock". You insert the case and tighten the collet around the rim of the case until tight. But before you tighten the collet, the cutter pilot is inserted in the case mouth to get the case concentric to the cutter blades. Once you are sure the pilot and the case are aligned, you tighten the collet. Turning the cutter shaft progressively reduces the length of the case. Once the cutter shaft is stopped from going any further forward, the final length of the case has been achieved. The cutter engagement length is controlled by a collar on the shaft that is held in place by a hex head allen screw. There is also a "minor adjustment" that allows the user to

move the stop collar just a small amount to fine tune the final length of the case, which is a helpful feature that the Wilson does not provide.

The Wilson unit has a threaded "tail stop" that is rotated to achieve the final trim-to-length of the case. Once that length is determined an allen head set screw is locked down. Since the Wilson unit does not use a collet to secure the case, it needs another method. This involves a case holder specific to the cartridge. The case is pushed into the case holder which is in-turn placed on the "rails" of the trimmer assembly and the case head is pushed up against the tail stop. A hold down clamp is tightened on the exterior of the case holder and the cutter is turned by hand until the cutter no longer moves forward.

How do the results vary? It has been my experience that the lengths of a collection of trimmed cases that are checked after the trimming is complete, varies more with the Forester unit than the Wilson unit. This could be operator error in not pushing the base of the case into the collet exactly the same each time or not using the pilot on the cutter shaft properly. And the "squareness" of the case mouth with the centerline of the case body of those cases trimmed with the Wilson, unit are more consistent. If there is a down side to the Wilson unit, it is the need to have case-specific case holders for each chambering you are working with. In some cases a single case holder can be used with more than one type of case. But the Wilson's slightly better performance outweighs the small cost

of the required case holder. And...the use of some machining or cutting oil is a plus with all case trimmer devices.

Varying lengths of cases in a specific lot of loaded ammo can have an impact on accuracy. This may be more of a concern with revolver cases or cases where a crimp is applied. Having the crimp occur at different locations along the bullet's "side-wall" can contribute to varying degrees of resistance at the time of ignition. And an "unsquare" case mouth can impart similar varying influences on the bullet during ignition also.

Sinclair, Midway, Midsouth, etc. are some of the sources for the trimmers and accessories mentioned here. Sinclair International offers a well thought-out stand for the Wilson unit along with an easy to use clamping device to hold the case holder in place.

True, nothing is 100%, including case preparation and maybe that's why a hardcore bench rest shooter will take only 8-10 cases to a match with him and load and shoot those "most consistent" cases all day during the match. A lot of work went into identifying those select cases and short of being individually machined out of solid round stock, will be the best that the shooter can come up with. We won't see that practice taking place at a silhouette match but anything we can do to our 40, 60 or 80-rounds used in a silhouette entry will help us be more consistent with our ammunition. And being consistent in many areas will help us produce better scores and have more FUN at our silhouette match!

The Forester unit at left is screwed down to a block of wood. At right is the L. E. Wilson unit on a Sinclair base. A simple C-clamp is used to hold either unit to the loading bench. In the foreground is a case inside of the L. E. Wilson case holder.

## SIERRA

The Bulletsmiths®

## 2011 New Product Announcement

.25 Caliber (.257 diameter)  
70 grain (Part # 1605) & 90 grain BlitzKing (Part # 1616)

Sierra is pleased to introduce the 2 newest members of our BlitzKing line; the 25 caliber 70 (flat base) & 90 (boat tail) grain BlitzKing bullets. Created to fill the demand for the longer range varmint crowd taking over where our current .20-6mm BlitzKings leave off.

These bullets will be available in boxes of 100 bullets and 500 bullets as indicated below.

Description	Part Number	Box Quantity	Grain Weight	2011 Retail	Ballistic Information	
					Sectional Density	B.C.
.257 Caliber 70 Grain BlitzKing	1605	100	70	\$ 28.46	0.151	.260 @ 3150 fps and above
.257 Caliber 70 Grain BlitzKing	1605C	500	70	\$140.93		.251 between 2800 and 3150 fps
.257 Caliber 70 Grain BlitzKing Moly	1605M	500	70	\$168.82		.242 between 1800 and 2800 fps .230 @ 1800 fps and below
.257 Caliber 90 Grain BlitzKing	1616	100	90	\$ 29.36	0.195	.388 @ 3100 fps and above
.257 Caliber 90 Grain BlitzKing	1616C	500	90	\$145.45		.375 between 2900 and 3100 fps
.257 Caliber 90 Grain BlitzKing Moly	1616M	500	90	\$173.34		.345 between 2400 and 2900 fps .330 @ 2400 fps and below
